

Scholar Deposit – Description of Work / Conditional Logic / **Article, Refereed & Article, Non-refereed**  
*Revised following discussions at Software Architecture Working Group, Aug. 13 and Sept. 24, 2015*

These changes are part of RUCore Release 7.7 (code freeze: September 2015). For each type of work, change the fields that are displayed on the form. The major change is to introduce this conditional logic. All the fields for each type of work are listed under that type of work. Not all fields will appear for all types of work. Within each type of work, changes from the current form are highlighted.

Every form will begin with the question of whether this is a version of a work that was previously selected. If so, the form will be populated with information from the previously deposited work. If not, the form will proceed to the selection of Type of Work.

1. **\*Are you depositing this work for the first time, or is this a version of a work you previously deposited?**
  - a. Another version of a previously deposited work
    - i. Replaces the question “Is there currently another version of this work in RUCore?”
    - ii. This is a required field
    - iii. If “First time deposit”, proceed to *\*Type of Work*
    - iv. If “Another version of a previously deposited work”, present a list of the author’s previously submitted work (as a popup, or as a page). The list should include the title and version. The depositor selects the title, and the form is auto-populated with the metadata from that version (**except the version and date**). The depositor will still be able to edit the form for this deposited work, and can change or remove values that have been supplied from the earlier version’s metadata. Write the persistent URL (DOI) of the selected work into mods:relatedItem when sending to the WMS, to allow the remaining manual work (linking in Fedora) by RUCore staff.
    - v. The depositor will see a completed form **EXCEPT** the Version (“Which term best describes this [article/book chapter/etc]?”) and Date will be left blank and the depositor will be required to supply that information.
  - b. First time deposit
    - i. Proceed to selection of *\*Type of Work*. The depositor will make a selection from this list.
    - ii. Depending on this selection, a separate form will open up for that Type of Work.
2. **\*Type of Work**
  - a. <mods:genre authority=“RULIB-FS”> (as before)
    - i. **Article**
      1. **<mods:genre> cannot be created until the next step (“Peer Reviewed”), for this selection**
    - ii. Book
    - iii. Book chapter
    - iv. Conference Paper or Lecture
    - v. Other Presentation or lecture
    - vi. Review
    - vii. Other

After the depositor chooses Type of Work, display all of the following fields on the page, in the order given.

### 3. Article

- a. **\*Peer Reviewed**       Yes     No
  - i. If "Yes"
    - 1. `<mods:typeOfResource>Text</mods:typeOfResource>`
    - 2. `<mods:genre authority="RULIB-FS">Article, Refereed</mods:genre>`
    - 3. `<mods:note type="peerReview">Peer reviewed</mods:note>`
    - 4. `<contentModel>Document</contentModel>`
  - ii. If "No"
    - 1. `<mods:typeOfResource>Text</mods:typeOfResource>`
    - 2. `<mods:genre authority="RULIB-FS">Article, Non-refereed</mods:genre>`
    - 3. `<contentModel>Document</contentModel>`
- b. **\*Which term best describes this article?**
  - i. Retain: "Mouse over each category for description" but make it more visible (use data well, or black)
  - ii. Retain list:
    - Author's Original (AO)
    - Submitted Manuscript Under Review (SMUR)
    - Accepted Manuscript (AM)
    - Version of Record (VoR)
    - Corrected Version of Record (CVoR)
    - Enhanced Version of Record (EVoR)
    - I don't know/not applicable
  - iii. Retain metadata mapping.
  - iv. Retain: Convert 'I don't know/not applicable' to 'Unidentified version'
- c. **\*Author**
  - i. Repeatable; use label "Add co-author"
  - ii. Retain metadata mapping.
  - iii. If two or more authors have the same Rutgers affiliation, add only one Corporate/Organization Name for Department and School (de-dupe) in the MODS XML.
- d. **\*Article Title**
  - i. Change label; formerly, "Title of Work"
  - ii. Retain metadata mapping.
- e. **\*Date**
  - i. Retain caption information "(YYYY)" and "(If this work has not been formally published, enter the date of creation.)" but make it more visible (use data well, or black)
  - ii. Retain metadata mapping.
- f. Abstract
  - i. Retain metadata mapping.
- g. Keywords
  - i. Retain caption: "(Separate keywords with commas ",") but make it more visible (use data well, or black).
  - ii. Although the caption will only suggest using commas, also allow a semi-colon to separate terms
  - iii. Retain metadata mapping.

h. Additional Information

- i. Remove "Add more" button. This field is not repeatable on the form. The reviewer/cataloger will separate if multiple notes are appropriate.
- ii. Retain metadata mapping.

i. Language of Article

- i. Change label; formerly, "Language of Work"
- ii. Retain metadata mapping.

j. Journal Information – All of these fields should appear within the "Journal Information" box

i. Journal title

1. Retain metadata mapping.

ii. Volume number

1. Give caption instruction to the right of the text box, (use data well, or black): "(Provide a number only)"
2. Retain metadata mapping.

iii. Issue number

1. Give caption instruction to the right of the text box, (use data well, or black): "(Provide a number only)"
2. Retain metadata mapping.

iv. Journal publication date

1. Change label; formerly, "Date of journal"
2. Retain caption instruction to the right of the text box, but make it more visible (use data well, or black): "(YYYY)"
3. Map to <rulib:descriptiveEvent><rulib:dataTime encoding="w3cdtf">

v. Start page

1. Change label; formerly, "Start page number"
2. Retain metadata mapping.

vi. End page

1. Change label; formerly, "End page number"
2. Retain metadata mapping.

**vii. Remove: Publisher**

viii. Link to Published Article

1. Change label; formerly, "URL for Published Work"
2. Change instructional caption to only give the example: "e.g., <http://dx.doi.org/doi:10.7282/T3WD3XW8>" and make it more visible: use data well, or black
3. Retain metadata mapping.

k. Grant Information

i. Change label; formerly, "Sponsoring Agency"

1. Map to <rulib:descriptiveEvent><rulib:type>Grant award

ii. Grantee Name

1. Retain metadata mapping.

iii. Funder/Agency Name [pull down list]

1. Change label; formerly, "Agency"
2. Retain metadata mapping.
3. For "National Institutes of Health":
  - i. **REMOVE additional agreements/options**
  - ii. Retain PMCID and its mapping:

- <mods:identifier type="PMCID">
                  - iii. NIHMS ID
                  - <mods:identifier type="NIHMSID">
- iv. Grant Number
  - 1. Change "Add more" to "Add another grant number", and place it to the right of the Grant Number text box. This will open up another Grant Number text box.
  - 2. Retain metadata mapping.
- v. Retain "Add more" for the overall Grant Information section, place it outside the "Grant Information" box (not within it), in a contrasting [green] color.
- l. Embargo Period
  - i. Retain pull-down list
  - ii. Retain metadata mapping.
- m. Note to SOAR staff
  - i. This note is not repeatable.
  - ii. Retain metadata mapping.
4. Create citation for cover sheet – **use current citation mapping.**

The following rubrics and examples are provided as reference aids, and are not to be used to construct citations for the published version or RUcore version.

APA

Author, A. A., Author, B. B., & Author, C. C. (Year). Title of article. *Title of Periodical*, volume number(issue number), pages. <http://dx.doi.org/xx.xxx/yyyy>

Harlow, H. F. (1983). Fundamentals for preparing psychology journal articles. *Journal of Comparative and Physiological Psychology*, 55, 893-896.

## Scholar Deposit – Description of Work / Conditional Logic / **Book**

These changes are part of RUcore Release 7.7 (code freeze: September 2015). For each type of work, change the fields that are displayed on the form. The major change is to introduce this conditional logic. All the fields for each type of work are listed under that type of work. Not all fields will appear for all types of work. Within each type of work, changes from the current form are highlighted.

Every form will begin with the question of whether this is a version of a work that was previously selected. If so, the form will be populated with information from the previously deposited work. If not, the form will proceed to the selection of Type of Work.

1. \*Are you depositing this work for the first time, or is this a version of a work you previously deposited?
  - a. Another version of a previously deposited work
    - i. Replaces the question “Is there currently another version of this work in RUcore?”
    - ii. This is a required field
    - iii. If “First time deposit”, proceed to \**Type of Work*
    - iv. If “Another version of a previously deposited work”, present a list of the author’s previously submitted work (as a popup, or as a page). The list should include the title and version. The depositor selects the title, and the form is auto-populated with the metadata from that version (**except the version and date**). The depositor will still be able to edit the form for this deposited work, and can change or remove values that have been supplied from the earlier version’s metadata. Write the persistent URL (DOI) of the selected work into mods:relatedItem when sending to the WMS, to allow the remaining manual work (linking in Fedora) by RUcore staff.
    - v. The depositor will see a completed form **EXCEPT** the Version (“Which term best describes this [article/book chapter/etc]?”) and Date will be left blank and the depositor will be required to supply that information.
  - b. First time deposit
    - i. Proceed to selection of \**Type of Work*. The depositor will make a selection from this list.
    - ii. Depending on this selection, a separate form will open up for that Type of Work.
5. \*Type of Work
  - a. <mods:genre authority=“RULIB-FS”> (as before)
    - i. Article
    - ii. **Book**
    - iii. Book chapter
    - iv. Conference Paper or Lecture
    - v. Other Presentation or lecture
    - vi. Review
    - vii. Other

After the depositor chooses Type of Work, display all of the following fields on the page, in the order given. **Note: There is no Version genre term for a Book.**

- b. \*Author
  - i. Repeatable; use label “Add co-author”
  - ii. Retain metadata mapping.

- iii. If two or more authors have the same Rutgers affiliation, add only one Corporate/Organization Name for Department and School (de-dupe) in the MODS XML.
- c. \*Book Title
  - i. Change label; formerly, "Title of Work"
  - ii. Retain metadata mapping.
- d. \*Date
  - i. Retain caption information "(YYYY)" and "(If this work has not been formally published, enter the date of creation.)" but make it more visible (use data well, or black)
  - ii. Retain metadata mapping.
- e. Edition
  - i. Caption information: **If other than the first edition**
  - ii. Make caption visible by using data well, or black
  - iii. Text box, free text
  - iv. Map to: <mods:originInfo><mods:edition>
- f. Publisher
  - i. Retain metadata mapping.
- g. Abstract
  - i. Retain metadata mapping.
- h. Keywords
  - i. Retain caption: "(Separate keywords with commas ",") but make it more visible (use data well, or black).
  - ii. Although the caption will only suggest using commas, also allow a semi-colon to separate terms
  - iii. Retain metadata mapping.
- i. Additional Information
  - i. Remove "Add more" button. This field is not repeatable on the form. The reviewer/cataloger will separate if multiple notes are appropriate.
  - ii. Retain metadata mapping.
- j. Language of Book
  - i. Change label; formerly, "Language of Work"
  - ii. Retain metadata mapping.
    - 1. Retain metadata mapping.
- k. Link to Published Book
  - i. Change label; formerly, "URL for Published Work"
  - ii. Change instructional caption to only give the example: "e.g., <https://mitpress.mit.edu/books/book-title>" and make it more visible: use data well, or black
  - iii. For this type of work (Book), use as the example the above URL, not the journal DOI link used for other types of work.
  - iv. Retain metadata mapping.
- l. Embargo Period
  - i. Retain pull-down list
  - ii. Retain metadata mapping.
- m. Note to SOAR staff
  - i. This note is not repeatable.
  - ii. Retain metadata mapping.

6. Generate a full citation on the cover sheet using the following metadata.

#### BOOK

Citation to published version –

If there is no edition, omit the parentheses after the title.

```
<mods:name type="personal"><mods:namePart type="family"> <mods:name  
type="personal"><mods:namePart type="given">. (<mods:originInfo><mods:dateCreated>).  
<mods:titleInfo type="main"><mods:title> <mods:originInfo><mods:edition>. Retrieved from  
<rulib:descriptiveEvent><rulib:type>Citation<rulib:associatedObject><rulib:identifier>
```

This should generate a citation like this:

Ness, Charlotte & Petal, Elinor. (2006). *Analysis of Common Knowledge: Assessment and Value* (2<sup>nd</sup> ed.). Retrieved from <https://mitpress.mit.edu/books/book-title>

Citation to this version –

If there is no edition, omit the parentheses after the title.

```
<mods:name type="personal"><mods:namePart type="family"> <mods:namePart type="given">.  
<mods:originInfo><mods:dateCreated>. <mods:titleInfo type="main"><mods:title>  
<mods:originInfo><mods:edition>. <mods:identifier type="doi">
```

This should generate a citation like this:

Ness, Charlotte & Petal, Elinor. (2006). *Analysis of Common Knowledge: Assessment and Value* (2<sup>nd</sup> ed.). <https://dx.doi.org/doi:10.7282/XXXXXXXX>

The following rubrics and examples are provided as reference aids, and are not to be used to construct citations for the published version or RUcore version.

Scholar Deposit – Description of Work / Conditional Logic / **Book Chapter**

*Revised following discussion at Software Architecture Working Group, August 13, 2015*

*Revised following RUCore testing, November 12, 2015*

These changes are part of RUCore Release 7.7 (code freeze: September 2015). For each type of work, change the fields that are displayed on the form. The major change is to introduce this conditional logic. All the fields for each type of work are listed under that type of work. Not all fields will appear for all types of work. Within each type of work, changes from the current form are highlighted.

Every form will begin with the selection of Type of Work. The depositor will make a selection from this list. Depending on this selection, a separate form will open up for that Type of Work.

1. **\*Type of Work**

a. <mods:genre authority="RULIB-FS"> (as before)

i. Article

ii. Book

**iii. Book chapter**

1. Retain mapping: <mods:genre authority="RULIB-FS">Book Chapter

iv. Conference Paper or Lecture

v. Other Presentation or lecture

vi. Review

vii. Other

After the depositor chooses Type of Work, display all of the following fields on the page, in the order given.

2. Book chapter

a. **\*Peer Reviewed**       Yes     No

i. If "Yes"

1. <mods:typeOfResource>Text</mods:typeOfResource>

2. <mods:genre authority="RULIB-FS">Book chapter</mods:genre>

3. <mods:note type="peerReview">Peer reviewed</mods:note>

4. <contentModel>Document</contentModel>

ii. If "No"

1. <mods:typeOfResource>Text</mods:typeOfResource>

2. <mods:genre authority="RULIB-FS">Book chapter</mods:genre>

3. <contentModel>Document</contentModel>

**b. Omit version logic for Book chapter**

c. **\*Chapter Author**

i. Change label; formerly, "Author"

ii. Repeatable; use label "Add co-author"

iii. Retain metadata mapping.

iv. If two or more authors have the same Rutgers affiliation, add only one Corporate/Organization Name for Department and School (de-dupe) in the MODS XML.

d. **\*Chapter Title**

i. Change label; formerly, "Title of Work"

ii. Retain metadata mapping .

- e. \*Date
  - i. Retain caption information “(YYYY)” and “(If this work has not been formally published, enter the date of creation.)” but make it more visible (use data well, or black)
  - ii. Retain metadata mapping .
- f. Abstract
  - i. Retain metadata mapping.
- g. Keywords
  - i. Retain caption: “(Separate keywords with commas “,”) but make it more visible (use data well, or black).
  - ii. Although the caption will only suggest using commas, also allow a semi-colon to separate terms
  - iii. Retain metadata mapping.
- h. Additional Information
  - i. Remove “Add more” button. This field is not repeatable on the form. The reviewer/cataloger will separate if multiple notes are appropriate.
  - ii. Retain metadata mapping.
- i. Language of Chapter
  - i. Change label; formerly, “Language of Work”
  - ii. Retain metadata mapping.
- j. Book and Chapter Information – All of these fields should appear within the “Book and Book Information” box
  - i. Book Title
    - 1. Map to <rulib:descriptiveEvent><rulib:type>Citation <rulib:associatedObject><rulib:type>Book <rulib:name>
  - ii. Book Publication Date (YYYY)
    - 1. Change label; formerly, “Date of journal”
    - 2. Retain caption instruction to the right of the text box, but make it more visible (use data well, or black): “(YYYY)”
    - 3. Retain metadata mapping.
  - iii. City of Publication
    - 1. Map to <rulib:descriptiveEvent><rulib:place>
  - iv. Publisher
    - 1. Map to <rulib:descriptiveEvent><rulib:associatedEntity><rulib:role>Publisher <rulib:name>
  - v. Chapter Start Page
    - 1. Change label; formerly, “Start page number”
    - 2. Retain metadata mapping.
  - vi. Chapter End Page
    - 1. Change label; formerly, “End page number”
    - 2. Retain metadata mapping.
  - vii. Book Editor(s)
    - 1. Caption: (Give all editors, separating names with semi-colons; for example: Caruthers, Abigail C.; O’Neil, James)
    - 2. Use data well, or black for caption

3. Supply the role:  
<rulib:descriptiveEvent><rulib:associatedEntity><rulib:role>Editor  
<rulib:name>

4. Put each editor in a separate field

viii. Link to Published Book Chapter/Book

1. Change label; formerly, "URL for Published Work"  
2. Change instructional caption to only give the example: "e.g.,  
<http://dx.doi.org/doi:10.7282/T3WD3XW8>" and make it more visible:  
use data well, or black

3. Retain metadata mapping.

k. Grant Information

i. Change label; formerly, "Sponsoring Agency"

1. Map to <rulib:descriptiveEvent><rulib:type>Grant award

ii. Grantee Name

1. Retain metadata mapping.

iii. Funder/Agency Name [pull down list]

1. Change label; formerly, "Agency"

2. Retain metadata mapping.

3. For "National Institutes of Health":

i. **REMOVE additional agreements/options**

ii. Retain PMCID and its mapping:  
<mods:identifier type="PMCID">

iii. NIHMS ID

<mods:identifier type="NIHMSID">

iv. Grant Number

1. Change "Add more" to "Add another grant number", and place it to the  
right of the Grant Number text box. This will open up another Grant  
Number text box.

2. Retain metadata mapping.

l. Retain "Add more" for the overall Grant Information section, place it outside the "Grant  
Information" box (not within it), in a contrasting [green] color.

m. Embargo Period

i. Retain pull-down list

ii. Retain metadata mapping.

n. Note to SOAR staff

i. This note is not repeatable.

ii. Retain metadata mapping.

3. Generate a full citation on the cover sheet using the following metadata.

#### BOOK CHAPTER TITLE

<mods:title type="main">

#### CITATIONS

NOTE: For all book chapter citations on the cover sheet, at least one name included in the citation will  
have the role of author. Include all authors in the citation.

<mods:role><mods:roleTerm type="text" authority="marcrt">author)

Generally, one or more other names included in the citation will have the role of editor. Include all  
editors in the citation.

< rilib:descriptiveEvent ><rilib:associatedEntity><rilib:role>Editor  
In addition, the name of the book publisher will be included in the citation.  
<rilib:descriptiveEvent><rilib:associatedEntity><rilib:role>Publisher

### **Published version**

To provide “Citation to Published Version”, there must be a Descriptive Event with type=“citation” which includes associated object name (at a minimum). When there is some DescriptiveEvent (type=“citation”) metadata, but the metadata is incomplete, use whatever is available. If there is no Descriptive Event (type=“citation”), supply the phrase “No citation available.”

Construct the citation for a Book Chapter as follows. The book title should be in italics:

```
<mods:name type="personal"><mods:namePart type="family">, <mods:namePart type="given"> (<rilib:descriptiveEvent type="citation"><rilib:dateTime>).  
<mods:titleInfo><mods:title type="main">. In <rilib:descriptiveEvent type="citation"><rilib:associatedEntity><rilib:role><Editor><rilib:name> (Eds.),  
<descriptiveEvent type="citation"><rilib:associatedObject><rilib:type>Book<name>  
(<rilib:descriptiveEvent type="citation"><rilib:associatedObject>><rilib:type>Book  
<rilib:detail>). <rilib:descriptiveEvent type="citation"><rilib:place>:  
<rilib:descriptiveEvent><rilib:associatedEntity>rilib:role><Publisher><rilib:name>.  
<rilib:descriptiveEvent type="citation"><rilib:associatedObject>><rilib:type>Book  
<rilib:reference>.
```

This should generate a citation like this:

Authorlastname, Authorfirstname (Date). Book chapter title. In EditorFirstName  
EditorMiddleName EditorLastName, Editor2FirstName Editor2MiddleName Editor2Lastname &  
Editor3FirstName Editor3MiddleName Editor3LastName (Eds.), *Book title* (pp-pp). Place:  
Publisher. DOI or URL.

For example:

O’Neil, James M., Egan, Aaron (2015). Men’s and women’s gender role journeys: A metaphor for healing, transition, and transformation. In Mary Jane Shockey, Suzanne B. Deft & Vince Johnson (Eds.), *Gender issues across the life cycle* (107-123). Evanston: Northwestern University Press.  
<http://www.migrationpolicy.org/research/CBI-book-ChildrenofBlackImmigrants>

### **This version**

Construct the citation for a Book Chapter as follows. The book title should be in italics:

```
<mods:name type="personal"><mods:namePart type="family">, <mods:namePart type="given"> (<rilib:descriptiveEvent type="citation"><rilib:dateTime>).  
<mods:titleInfo><mods:title type="main">. In <rilib:descriptiveEvent type="citation"><rilib:associatedEntity><rilib:role><Editor><rilib:name> (Eds.),  
<descriptiveEvent type="citation"><rilib:associatedObject><rilib:type>Book<name>  
(<rilib:descriptiveEvent type="citation"><rilib:associatedObject>><rilib:type>Book  
<rilib:detail>). <rilib:descriptiveEvent type="citation"><rilib:place>:
```

<rulib:descriptiveEvent><rulib:associatedEntity>rulib:role><Publisher><rulib:name>.  
<rulib:identifier type="doi">.

This should generate a citation like this:

Authorlastname, Authorfirstname (Date). Book chapter title. In EditorFirstName  
EditorMiddleName EditorLastName, Editor2FirstName Editor2MiddleName Editor2Lastname &  
Editor3FirstName Editor3MiddleName Editor3LastName (Eds.), *Book title* (pp-pp). Place:  
Publisher. DOI or URL.

For example:

O'Neil, James M., Egan, Aaron (2015). Men's and women's gender role journeys: A metaphor for  
healing, transition, and transformation. In Mary Jane Shockey, Suzanne B. Deft & Vince Johnson (Eds.),  
*Gender issues across the life cycle* (107-123). Evanston: Northwestern University Press.  
<http://dx.doi.org/doi:10.7282/T3GFOSOF>.

These rubrics and examples are provided as reference aids, and are not to be used to construct citations  
for the published version or RUcore version.

APA

## Scholar Deposit – Description of Work / Conditional Logic / **Conference Paper or Lecture**

These changes are part of RUcore Release 7.7 (code freeze: October 2015). For each type of work, change the fields that are displayed on the form. The major change is to introduce this conditional logic. All the fields for each type of work are listed under that type of work. Not all fields will appear for all types of work. Within each type of work, changes from the current form are highlighted.

Every form will begin with the question of whether this is a version of a work that was previously selected. If so, the form will be populated with information from the previously deposited work. If not, the form will proceed to the selection of Type of Work.

2. **\*Are you depositing this work for the first time, or is this a version of a work you previously deposited?**
  - a. Another version of a previously deposited work
    - i. Replaces the question “Is there currently another version of this work in RUcore?”
    - ii. This is a required field
    - iii. If “First time deposit”, proceed to *\*Type of Work*
    - iv. If “Another version of a previously deposited work”, present a list of the author’s previously submitted work (as a popup, or as a page). The list should include the title and version. The depositor selects the title, and the form is auto-populated with the metadata from that version (**except the version and date**). The depositor will still be able to edit the form for this deposited work, and can change or remove values that have been supplied from the earlier version’s metadata. Write the persistent URL (DOI) of the selected work into mods:relatedItem when sending to the WMS, to allow the remaining manual work (linking in Fedora) by RUcore staff.
    - v. The depositor will see a completed form **EXCEPT** the Version (“Which term best describes this [article/book chapter/etc]?”) and Date will be left blank and the depositor will be required to supply that information.
  - b. First time deposit
    - i. Proceed to selection of *\*Type of Work*. The depositor will make a selection from this list.
    - ii. Depending on this selection, a separate form will open up for that Type of Work.
7. **\*Type of Work**
  - a. <mods:genre authority=“RULIB-FS”> (as before)
    - i. Article
    - ii. Book
    - iii. Book chapter
    - iv. **Conference Paper or Lecture**
      1. Retain mapping: <mods:genre authority=“RULIB-FS”>Conference Paper or Lecture
    - v. Other Presentation or lecture
    - vi. Review
    - vii. Other

After the depositor chooses Type of Work, display all of the following fields on the page, in the order given.

## 8. Conference Paper or Lecture

- a. \*Peer Reviewed       Yes    No

i. If "Yes"

1. `<mods:typeOfResource>Text</mods:typeOfResource>`
2. `<mods:genre authority="RULIB-FS">Conference Paper or Lecture</mods:genre>`
3. `<mods:note type="peerReview">Peer reviewed</mods:note>`
4. `<contentModel>Document</contentModel>`

ii. If "No"

1. `<mods:typeOfResource>Text</mods:typeOfResource>`
2. `<mods:genre authority="RULIB-FS">Conference Paper or Lecture</mods:genre>`
3. `<contentModel>Document</contentModel>`

- b. \*Which term best describes this conference paper?

- i. Retain: "Mouse over each category for description" but make it more visible (use data well, or black)
- ii. Retain list:
  - Author's Original (AO)
  - Submitted Manuscript Under Review (SMUR)
  - Accepted Manuscript (AM)
  - Version of Record (VoR)
  - Corrected Version of Record (CVoR)
  - Enhanced Version of Record (EVoR)
  - I don't know/not applicable
- iii. Retain metadata mapping.
- iv. Retain: Convert 'I don't know/not applicable' to 'Unidentified version'

- c. \*Author

- i. Repeatable; use label "Add co-author"
- ii. Retain metadata mapping.
- iii. If two or more authors have the same Rutgers affiliation, add only one Corporate/Organization Name for Department and School (de-dupe) in the MODS XML.

- d. \*Conference Paper Title

- i. Change label; formerly, "Title of Work"
- ii. Retain metadata mapping.

- e. \*Date

- i. Retain caption information "(YYYY)" and "(If this work has not been formally published, enter the date of creation.)" but make it more visible (use data well, or black)
- ii. Retain metadata mapping.

- f. Abstract

- i. Retain metadata mapping.

- g. Keywords

- i. Retain caption: "(Separate keywords with commas ",") but make it more visible (use data well, or black).
- ii. Although the caption will only suggest using commas, also allow a semi-colon to separate terms
- iii. Retain metadata mapping.

h. Language of Conference Paper

- i. Change label; formerly, "Language of Work"
- ii. Retain metadata mapping.

i. **Conference Proceedings Information** – All of these fields should appear within the "Conference Proceedings" box. **NOTE THAT WE WILL CREATE TWO DESCRIPTIVE EVENTS, ONE FOR THE CONFERENCE AND ONE FOR THE CITATION.**

i. Proceedings title

1. Retain metadata mapping that was formerly used for Journal Title. (descriptiveEvent type="Citation")

ii. Publisher of Proceedings

1. Change mapping to:  
<rulib:descriptiveEvent type="Citation"><rulib:associatedEntity><rulib:role>Publisher  
<rulib:descriptiveEvent><rulib:associatedEntity><rulib:name>

iii. Conference Date

1. Change label; formerly, "Date of journal"
2. Revise caption instruction to the right of the text box to include "month", and make it more visible (use data well, or black): "(YYYY-MM)"
3. Map to <rulib:descriptiveEvent type="Citation"><rulib:dateTime encoding="w3cdtf">

iv. Link to Published Conference Paper

1. Change label; formerly, "URL for Published Work"
2. Change instructional caption to only give the example: "e.g., <http://dx.doi.org/doi:10.7282/T3WD3XW8>" and make it more visible: use data well, or black
3. Retain metadata mapping.

v. Conference Name

1. Map to:  
<rulib:descriptiveEvent type="Conference"><rulib:label>

vi. Conference Number

1. Give caption instruction to the right of the text box (use data well, or black): "(Provide an ordinal number, e.g. 3rd or a cardinal number, e.g., 15)"
2. Map to:  
<rulib:descriptiveEvent type="Conference"><rulib:detail>

vii. Conference Location

1. Give caption instruction to the right of the text box (use data well, or black): "(e.g., San Francisco, Calif.)"
2. Map to:  
<rulib:descriptiveEvent type="Conference"><rulib:place>

viii. Organization or Sponsor Name

1. Map to:  
<rulib:descriptiveEvent type="Conference"><rulib:associatedEntity><rulib:role>Sponsor  
<rulib:descriptiveEvent type="Conference"><rulib:associatedEntity><rulib:name>

j. Grant Information

- i. Change label; formerly, "Sponsoring Agency"
  - 1. Map to <rulib:descriptiveEvent><rulib:type>Grant award
- ii. Grantee Name
  - 1. Retain metadata mapping.
- iii. Funder/Agency Name [pull down list]
  - 1. Change label; formerly, "Agency"
  - 2. Retain metadata mapping.
  - 3. For "National Institutes of Health":
    - i. **REMOVE additional agreements/options**
    - ii. Retain PMCID and its mapping:  
<mods:identifier type="PMCID">
    - iii. NIHMS ID  
<mods:identifier type="NIHMSID">
- iv. Grant Number
  - 1. Change "Add more" to "Add another grant number", and place it to the right of the Grant Number text box. This will open up another Grant Number text box.
  - 2. Retain metadata mapping.
  - 3. Retain "Add more" for the overall Grant Information section, place it outside the "Grant Information" box (not within it), in a contrasting [green] color.
- k. Embargo Period
  - i. Retain pull-down list
  - ii. Retain metadata mapping.
- l. Note to SOAR staff
  - i. This note is not repeatable.
  - ii. Retain metadata mapping.

9. Generate a full citation on the cover sheet using the following metadata.

CONFERENCE PAPER OR LECTURE TITLE

Citation to published version –

```
<mods:name type="personal"><mods:namePart type="family"> <mods:namePart type="given">
(<rulib:descriptiveEvent><rulib:type>Citation<rulib:dateTime>). <mods:title type="main">. Paper
presented at <rulib:descriptiveEvent><rulib:type>Conference<rulib:label>,
<rulib:descriptiveEvent><rulib:type>Conference<rulib:place>
<rulib:descriptiveEvent><rulib:type>Citation<rulib:associatedObject><rulib:identifier>
```

This should generate a citation like this:

Tarver, Hannah, Phillips, Mark, Zavalina, Oksana & Kizhakkethil, Priya. (2015). *An Exploratory Analysis of Subject Metadata in the Digital Public Library of America*. Paper presented at International Conference on Dublin Core and Metadata Applications DC-2015, São Paulo, Brazil.  
<http://dcevents.dublincore.org/IntConf/dc-2015/paper/view/348/362>

Citation to this version –

```
<mods:name type="personal"><mods:namePart type="family"> <mods:namePart type="given">
<rulib:descriptiveEvent><rulib:type>Citation<rulib:dateTime>. <mods:title type="main">. Paper
presented at <rulib:descriptiveEvent><rulib:type>Conference<rulib:label>
<rulib:descriptiveEvent><rulib:type>Conference<rulib:place> <mods:identifier type="doi">
```

This should generate a citation like this:

Tarver, Hannah, Phillips, Mark, Zavalina, Oksana & Kizhakkethil, Priya. (2015). *An Exploratory Analysis of Subject Metadata in the Digital Public Library of America*. Paper presented at International Conference on Dublin Core and Metadata Applications DC-2015, São Paulo, Brazil.  
<https://dx.doi.org/doi:10.7282/XXXXXXXX>

NOTE: For all conference paper citations on the cover sheet, at least one name included in the citation will have the role of author. Include all names with the role of "author" in the citation.

```
<mods:role><mods:roleTerm type="text" authority="marcrt">author
```

The following rubrics and examples are provided as reference aids, and are not to be used to construct citations for the published version or RUCore version.

## Scholar Deposit – Description of Work / Conditional Logic / **Other**

Following discussions at Software Architecture Working Group, Aug. 13 and Sept. 24, 2015

These changes are part of RUcore Release 7.7 (code freeze: September 2015). For each type of work, change the fields that are displayed on the form. The major change is to introduce this conditional logic. All the fields for each type of work are listed under that type of work. Not all fields will appear for all types of work. Within each type of work, changes from the current form are highlighted.

Every form will begin with the question of whether this is a version of a work that was previously selected. If so, the form will be populated with information from the previously deposited work. The form will display for the Type of Work of the title selected. If this is a first time deposit for the work, the form will proceed to the selection of Type of Work.

3. \*Are you depositing this work for the first time, or is this a version of a work you previously deposited?
  - a. Another version of a previously deposited work
    - i. Replaces the question “Is there currently another version of this work in RUcore?”
    - ii. This is a required field
    - iii. If “First time deposit”, proceed to \*Type of Work
    - iv. If “Another version of a previously deposited work”, present a list of the author’s previously submitted work (as a popup, or as a page). The list should include the title and version. The depositor selects the title, and the form is auto-populated with the metadata from that version (**except the version and date**). The form should display the form for the Type of Work of the title selected. The depositor will still be able to edit the form for this deposited work, and can change or remove values that have been supplied from the earlier version’s metadata. Write the persistent URL (DOI) of the selected work into mods:relatedItem when sending to the WMS, to allow the remaining manual work (linking in Fedora) by RUcore staff.
    - v. The depositor will see a completed form **EXCEPT** the Version (“Which term best describes this [article/book chapter/etc]?”) and Date will be left blank and the depositor will be required to supply that information.
  - b. First time deposit
    - i. Proceed to selection of \*Type of Work. The depositor will make a selection from this list.
    - ii. Depending on this selection, a separate form will open up for that Type of Work.
10. \*Type of Work
  - a. <mods:genre authority=”RULIB-FS”> (as before)
    - i. Article
    - ii. Book
    - iii. Book chapter
    - iv. Conference Paper or Lecture
    - v. Other Presentation or lecture
    - vi. Review
    - vii. **Other**

After the depositor chooses Type of Work, display all of the following fields on the page, in the order given.

## 11. Article

- a. \*Author
  - i. Repeatable; use label "Add co-author"
  - ii. Retain metadata mapping.
  - iii. If two or more authors have the same Rutgers affiliation, add only one Corporate/Organization Name for Department and School (de-dupe) in the MODS XML.
- b. \*Title of Work
  - i. Retain metadata mapping.
- c. \*Date
  - i. Retain caption information "(YYYY)" and "(If this work has not been formally published, enter the date of creation.)" but make it more visible (use data well, or black)
  - ii. Retain metadata mapping.
- d. Abstract
  - i. Retain metadata mapping.
- e. Keywords
  - i. Retain caption: "(Separate keywords with commas ",") but make it more visible (use data well, or black).
  - ii. Although the caption will only suggest using commas, also allow a semi-colon to separate terms
  - iii. Retain metadata mapping.
- f. Additional Information
  - i. Remove "Add more" button. This field is not repeatable on the form. The reviewer/cataloger will separate if multiple notes are appropriate.
  - ii. Retain metadata mapping.
- g. Note to SOAR staff
  - i. This note is not repeatable.
  - ii. Retain metadata mapping.

## 12. Create citation for cover sheet.

- a. There is no citation to published version.
- b. Author(s). (Year). Title of work.

### Citation to this version –

```
<mods:name type="personal"><mods:namePart type="family"><mods:namePart type="given">  
<mods:originInfo><mods:dateCreated>. <mods:title type="main"><mods:titleInfo>. <mods:identifier  
type="doi">
```

This should generate a citation like this (single author, multiple authors):

Harlow, H. F. (1983). Fundamentals for preparing psychology journal articles.

Wysocki, Anne Frances, Johnson-Eilola, Johndan, Selfe, Cynthia L. & Geoffrey Sirc. (2006). A Special Education.

## Scholar Deposit – Description of Work / Conditional Logic / **Other Presentation or Lecture**

These changes are part of RUcore Release 7.7 (code freeze: October 2015). For each type of work, change the fields that are displayed on the form. The major change is to introduce this conditional logic. All the fields for each type of work are listed under that type of work. Not all fields will appear for all types of work. Within each type of work, changes from the current form are highlighted.

Every form will begin with the selection of Type of Work. The depositor will make a selection from this list. Depending on this selection, a separate form will open up for that Type of Work.

1. **\*Type of Work**
  - a. <mods:genre authority="RULIB-FS"> (as before)
    - i. Article
    - ii. Book
    - iii. Book chapter
    - iv. Conference Paper or Lecture
    - v. **Other Presentation or Lecture**
      1. Retain mapping: <mods:genre authority="RULIB-FS">Other Presentation or Lecture
      2. Retain mapping: <mods:typeOfResource>Text</mods:typeOfResource>
      3. Retain mapping: techMD <contentModel>Document</contentModel>
    - vi. Review
    - vii. Other

After the depositor chooses Type of Work, display all of the following fields on the page, in the order given.

2. **\*Author**
  - a. Repeatable; use label "Add co-author"
  - b. Retain metadata mapping.
  - c. If two or more authors have the same Rutgers affiliation, add only one Corporate/Organization Name for Department and School (de-dupe) in the MODS XML.
3. **\*Title of Presentation or Lecture**
  - a. Change label; formerly, "Title of Work"
  - b. Retain metadata mapping.
4. **\*Date**
  - a. Retain caption information "(YYYY)" and "(If this work has not been formally published, enter the date of creation.)" but make it more visible (use data well, or black)
  - b. Retain metadata mapping.
5. Abstract
  - a. Retain metadata mapping.
6. Keywords
  - a. Retain caption: "(Separate keywords with commas ",")" but make it more visible (use data well, or black).
  - b. Although the caption will only suggest using commas, also allow a semi-colon to separate terms

- c. Retain metadata mapping.
- 7. Additional Information
  - a. Remove “Add more” button. This field is not repeatable on the form. The reviewer/cataloger will separate if multiple notes are appropriate.
  - b. Retain metadata mapping.
- 8. Language of Presentation or Lecture
  - a. Change label; formerly, “Language of Work”
  - b. Retain metadata mapping.
- 9. Remove: Grant Information**
- 10. Embargo Period
  - a. Retain pull-down list
    - i. Retain metadata mapping.
- 11. Note to SOAR staff
  - a. This note is not repeatable.
  - b. Retain metadata mapping.

Generate a full citation on the cover sheet using the following metadata.

## CITATIONS

(No published version)

### Citation to this version –

```
<mods:name type="personal"><mods:namePart type="family"><mods:namePart type="given">
<mods:originInfo><mods:dateCreated>. <mods:title type="main">
<rulib:descriptiveEvent><rulib:type>Citation<rulib:detail> <mods:identifier type="doi">
```

This should generate a citation like this:

Tarver, Hannah, Phillips, Mark, Zavalina, Oksana & Kizhakkethil, Priya. (2015). *An Exploratory Analysis of Subject Metadata in the Digital Public Library of America*. Presented at the ACRL-NY Annual Conference, New York, N.Y. <https://dx.doi.org/doi:10.7282/XXXXXXX>

NOTE: Include all names with the role of “author” in the citation.

```
<mods:role><mods:roleTerm type="text" authority="marcrt">author
```

NOTE: Cataloger will supply appropriate context information in Descriptive Event – Detail.

## Scholar Deposit – Description of Work / Conditional Logic / **Review**

These changes are part of RUcore Release 7.7 (code freeze: October 2015). For each type of work, change the fields that are displayed on the form. The major change is to introduce this conditional logic. All the fields for each type of work are listed under that type of work. Not all fields will appear for all types of work. Within each type of work, changes from the current form are highlighted.

Every form will begin with the selection of Type of Work. The depositor will make a selection from this list. Depending on this selection, a separate form will open up for that Type of Work.

### 13. \*Type of Work

- a. <mods:genre authority="RULIB-FS"> (as before)
  - i. Article
  - ii. Book
  - iii. Book chapter
  - iv. Conference Paper or Lecture
  - v. Other Presentation or lecture
  - vi. **Review**
    1. Retain mapping: <mods:genre authority="RULIB-FS">Review
    2. Retain mapping: <mods:typeOfResource>Text</mods:typeOfResource>
    3. Retain mapping: techMD <contentModel>Document</contentModel>
  - vii. Other

After the depositor chooses Type of Work, display all of the following fields on the page, in the order given.

If the depositor chooses **Article**, **Review**, or **Conference Paper or Lecture**, the form will next ask whether this is a version of a work that was previously selected. If so, the form will be populated with information from the previously deposited work. If not, the form will proceed to the selection of Type of Work.

### 4. \*Are you depositing this work for the first time, or is this a version of a work you previously deposited?

- b. Another version of a previously deposited work
  - i. Replaces the question "Is there currently another version of this work in RUcore?"
  - ii. This is a required field when it is used
  - iii. If "First time deposit", proceed to open the form with the rest of the fields, beginning with *\*Version*
  - iv. If "Another version of a previously deposited work", present a list of the author's previously submitted work (as a popup, or as a page). The list should include the title and version. The depositor selects the title, and the form is auto-populated with the metadata from that version (**except the version and date**). The depositor will still be able to edit the form for this deposited work, and can change or remove values that have been supplied from the earlier version's metadata. Write the persistent URL (DOI) of the selected work into mods:relatedItem when sending to the WMS, to allow the remaining manual work (linking in Fedora) by RUcore staff.

v. The depositor will see a completed form **EXCEPT** the *Version* (“Which term best describes this [article/book chapter/etc]?”) and *Date* will be left blank and the depositor will be required to supply that information.

c. First time deposit

#### 14. Version

a. \*Which term best describes this **review**?

i. Retain: “Mouse over each category for description” but make it more visible (use data well, or black)

ii. Retain list:

- Author’s Original (AO)
- Submitted Manuscript Under Review (SMUR)
- Accepted Manuscript (AM)
- Version of Record (VoR)
- Corrected Version of Record (CVoR)
- Enhanced Version of Record (EVoR)
- I don’t know/not applicable

iii. Retain metadata mapping.

iv. Retain: Convert ‘I don’t know/not applicable’ to ‘Unidentified version’

b. \*Review Author

i. Change label; formerly, “Author”

ii. Repeatable; use label “Add co-author”

iii. Retain metadata mapping.

iv. If two or more authors have the same Rutgers affiliation, add only one Corporate/Organization Name for Department and School (de-dupe) in the MODS XML.

c. \*Review Title

i. Change label; formerly, “Title of Work”

ii. Retain metadata mapping .

d. \*Date

i. Retain caption information “(YYYY)” and “(If this work has not been formally published, enter the date of creation.)” but make it more visible (use data well, or black)

ii. Retain metadata mapping .

e. Abstract

i. Retain metadata mapping.

f. Keywords

i. Retain caption: “(Separate keywords with commas “,”) but make it more visible (use data well, or black).

ii. Although the caption will only suggest using commas, also allow a semi-colon to separate terms

iii. Retain metadata mapping.

g. Additional Information

i. Remove “Add more” button. This field is not repeatable on the form. The reviewer/cataloger will separate if multiple notes are appropriate.

ii. Retain metadata mapping.

h. Language of Review

i. Change label; formerly, “Language of Work”

ii. Retain metadata mapping.

i. Review Information – All of these fields should appear within the “Review Information” box

i. Title of Reviewed Work

1. Supply the descriptive event – associated object type:

```
<rulib:descriptiveEvent><rulib:type>Citation<rulib:associatedEntity><rulib:type>Book
```

2. Supply the descriptive event – associated object relationship:

```
<rulib:descriptiveEvent><rulib:type>Citation<rulib:associatedObject><rulib:type>Book<rulib:relationship>Is Described by
```

3. Map to:

```
<rulib:descriptiveEvent><rulib:type>Citation<rulib:associatedObject><rulib:associatedEntity><rulib:name>[value]
```

ii. Author(s) of Reviewed Work

1. Map to:

```
<rulib:descriptiveEvent><rulib:type>Citation<rulib:associatedEntity><rulib:name>[value]
```

2. Supply the role:

```
<rulib:descriptiveEvent><rulib:associatedEntity><rulib:role>Author
```

3. Caption: (Give all authors, for example: Caruthers, Abigail C., O’Neil, James)

4. Use data well, or black for caption

iii. Journal title

1. Retain metadata mapping.

iv. Journal volume number

1. Change label; formerly, “Volume number”

2. Give caption instruction to the right of the text box, (use data well, or black): “(Provide a number only)”

3. Retain metadata mapping.

v. Journal issue number

1. Change label; formerly, “Issue number”

2. Give caption instruction to the right of the text box, (use data well, or black): “(Provide a number only)”

3. Retain metadata mapping.

vi. Journal publication date

1. Change label; formerly, “Date of journal”

2. Retain caption instruction to the right of the text box, but make it more visible (use data well, or black): “(YYYY)”

3. Map to <rulib:descriptiveEvent><rulib:dateTime encoding=”w3cdtf”>YYYY

vii. Start page of review

1. Change label; formerly, “Start page number”

2. Retain metadata mapping.

viii. End page of review

1. Change label; formerly, “End page number”

2. Retain metadata mapping.

ix. Remove: Publisher

x. Link to Published Review

1. Change label; formerly, "URL for Published Work"
2. Change instructional caption to only give the example: "e.g., <http://dx.doi.org/doi:10.7282/T3WD3XW8>" and make it more visible: use data well, or black
3. Retain metadata mapping.

**j. Remove: Grant Information**

- k. Embargo Period
  - i. Retain pull-down list
  - ii. Retain metadata mapping.
- l. Note to SOAR staff
  - i. This note is not repeatable.
  - ii. Retain metadata mapping.

15. Generate a full citation on the cover sheet using the following metadata.

## CITATIONS

### Published version

To provide "Citation to Published Version", there must be a Descriptive Event with type="Citation" which includes associated object name (at a minimum). When there is some DescriptiveEvent (type="Citation") metadata, but the metadata is incomplete, use whatever is available. If there is no Descriptive Event (type="Citation"), supply the phrase "No citation available."

Construct the citation for a Review as follows. The *title of the journal* and the *title of the work being reviewed* should be in italics:

```
<mods:name type="personal"><mods:namePart type="family"> <mods:namePart
type="given"> {<rulib:descriptiveEvent type="citation"><rulib:dateTime>}
<mods:titleInfo><mods:title type="main"> . [Review of the book
<rulib:descriptiveEvent><rulib:type>Citation<rulib:associatedObject><rulib:type>Book<rulib:as
sociatedEntity><rulib:name> ].
<rulib:descriptiveEvent><rulib:type>Citation<rulib:associatedObject><rulib:type>Journal<rulib:as
sociatedEntity><rulib:name> .
<rulib:descriptiveEvent><rulib:type>Citation<rulib:associatedObject><rulib:type>Journal<rulib:i
dentifier>
<rulib:descriptiveEvent><rulib:type>Citation<rulib:associatedObject><rulib:type>Journal<rulib:d
etail> . Retrieved from
<rulib:descriptiveEvent><rulib:type>Citation<rulib:associatedObject><rulib:type>Journal<rulib:r
eference> .
```

This should generate a citation like this:

Authorlastname, Authorfirstname (Date). Review title. [Review of the book *Title of Book*]. *Journal Title*, Vol(Issue), pp-pp. Retrieved from DOI or URL.

For example:

O'Neil, James M., Egan, Aaron (2015). Can life cycle through the genders? [Review of the book *Gender issues across the life cycle*]. *Journal of Gender Studies*, 13(4), 107-123. Retrieved from <http://dx.doi.org/xx.xxx/yyyyy>

### **This version**

```
<mods:name type="personal"><mods:namePart type="family"><mods:namePart type="given"><rulib:descriptiveEvent type="citation"><rulib:dateTime><mods:titleInfo><mods:title type="main"> [Review of the book <rulib:descriptiveEvent><rulib:type>Citation<rulib:associatedObject><rulib:type>Book<rulib:associatedEntity><rulib:name> ], <rulib:descriptiveEvent><rulib:type>Citation<rulib:associatedObject><rulib:type>Journal<rulib:associatedEntity><rulib:name> , <rulib:descriptiveEvent><rulib:type>Citation<rulib:associatedObject><rulib:type>Journal<rulib:identifier> , <rulib:descriptiveEvent><rulib:type>Citation<rulib:associatedObject><rulib:type>Journal<rulib:detail> . Retrieved from <mods:identifier type="doi">
```

This should generate a citation like this:

Authorlastname, Authorfirstname (Date). Review title. [Review of the book *Title of Book*]. *Journal Title*, Vol(Issue), pp-pp. Retrieved from DOI.

For example:

O'Neil, James M., Egan, Aaron (2015). Can life cycle through the genders? [Review of the book *Gender issues across the life cycle*]. *Journal of Gender Studies*, 13(4), 107-123. Retrieved from <http://dx.doi.org/doi:10.7282/T3WD3XW8>

These rubrics and examples are provided as reference aids, and are not to be used to construct citations for the published version or RUcore version.
