April's Liberal Receipts and Lagging Demand Believed Cause

WASHINGTON, D. C.-Liberal receipts, lagging demand for current consumption, and rapidly increasing stocks in storage, brought are 4565 cases, almost a hundred about a change of sentiment in per cent increase. the egg markets during April, the U. S. Bureau of Agricultural Position of Eggs Economics reports.

From a willingness to store surplus supplies early in the month at prices four to five cents above similar prices a year earlier, storage interests became less optimis-April last year.

Trade output at the four markets of New York, Chicago, Boston and Philadelphia during April, as judged by receipts and changes in storage stocks, was from 16 to 18 per cent less than in April last unsatisfactory consumer demand. Prices on Middle Western Mixed Colors and nearby Eastern Whites declined three-quarters to two and a half cents per dozen. Prices on Pacific Coast Whites, however, remained unchanged.

It is difficult to find a logical explanation for the recent weakness in the egg markets, says the Bureau.. According to reports received from crop correspondents over the country, total egg production on Apr. 1 was just about the same as a year earlier, but much less than the 10-year (1925-34) average. Receipts of eggs at the four markets in April were slightly smaller than those of April last year. A larger proportion of the receipts were placed in storage, however, because of a good de-(Turn to Page 2, Please)

HIGHTSTOWN AUCTION SALES NEARLY DOUBLE

HIGHTSTOWN, N. J.-Sales of eggs at the auction conducted here by the Tri-County Co-operative Auction Market Association show a remarkable increase for April over the same month last year.

An increase of 2125 cases of eggs over April, 1936, or nearly double last year's sales, is reported by Charles Kingsland, egg auction manager.

In April, last year, 2440 cases of eggs were disposed of while this year the same month's totals

of Disease Danger in Baby Chick Racket

HARTFORD, CONN.-Connecticut poultrymen are being advised by the State Department of Agriculture to be on the lookout for an ingenious racket which has recently come to light in the New England States. The racket is forcing postmasters to auction baby chicks to the highest bidder and the Department feels that one of its most serious aspects lies in the possibility of poultrymen buying these "bargain" chicks from TURKEYS THIS SEASON the means of introducing disease into their flocks.

With the same mail at which the Poultry dealers report a number chicks were delivered to the post been interested, now have good postmaster receives a letter by air had been sent by mistake to the Whether they won or lost, they wrong state and requesting that he

> duction during the fall when eggs are going to be worth real money. Rearing Problem

I have been following H. E. Wettyen's Hen Derby, at Passaic, N. J., quite closely for many months and I find that it is teaching us many valuable lessons.

This month, Wettyen reports that they have had considerable mortality among the contestants and a careful investigation as to the cause brings to the front the possibility that it has been due to rearing problems. We can say and do what we please but this idea of sanitation and ideal growing conditions advocated by the colleges is at last bearing fruit.

... the Litter that STAYS Dry!

CTAZDRY is the ideal litter for brooder houses, laying houses and nesting material. Air circulates through it and keeps it dry. That is why Stazdry lasts longer and will save you money.

Highly absorbent, dustless, bright in color, resilient, Stazdry is a sterilized product—patent protected—made in U.S.A. No other little like it. An excellent bedding material for cattle and horses. Bales break apart easily. If you feed dealer doesn't have Stazdry write for FREE BOOKLET.

STAZDRY IS SOLD BY ALL PROGRESSIVE FEED DEALERS

that the increase in supply of Chicago, Illinois table eggs in the New York mar-25,000 CHANCES

to go RIGHT or WRONG! When you feed 25,000 turkeys . . . over 4 tons a day at the peak of the feeding period . . . a very little difference in the nutritional value of various feeds means a difference of thousands of dollars

at the end of the year. Here's the record at Shagroy Farms, Lakeville, Conn.:

25,000 birds started on Ti-o-ga Turkantine, grown on Ti-o-ga Turkey Grower.

Average feed per bird (including wastage) . . . 68 lbs. Average dressed weight per bird . . . 15% lbs. Average feed (including wastage) per lb. of meat (dressed

weight) . . . 41/3 lbs. What is best for 25,000 turkeys is best for one. Whatever the size of your flock, you'll find it pays to feed Ti-o-ga Turkatine and and Ti-o-ga Turkey Grower to poults and Ti-o-ga Breedertine to

breeding stock. Feed Ti-o-ga Turkey Feeds this year according to the Ti-o-ga Feeding Program and Save on Labor . . Lower your Costs . . Increase your Profits.

(All these Ti-o-ga Feeds are furnished in mash or pellet form.) Turkatine and Ti-o-ga Turkey Grower TIOGA MILLS, INC., WAVERLY, N. Y.

or May Be Purchased Separately

Lower Your Feed Costs One-Half NOW by Growing All Pullets for Layers or All Cockerels

EXTRA-Profit

Feed prices high? Yes, but we can cut them in half for you. This year we can give our customers all pullet and all cockerel chicks, whichever they wish. If it's eggs you want, buy baby pullet chicks and you won't have to spend money to feed a lot of hungry cockerels for the entire rearing season. If you are out to raise broilers or roasters, book your orders for all cockerels and avoid feeding those unwanted pullets.

for Broilers and Roasters.

Be wise and take advantage of this opportunity to buy just what you want. Continued high feed prices have made this sexing service, which we are now offering, more important than ever before to the poultry raiser.

Eastern Egg-Feed Ratio

(N. Y. State Dept. of Agriculture)
NEW YORK—In determining the
egg-feed ratio for the week ending Apr. 29, 1937, the following figures were used: \$2.75, the cost of 100 tions. All grades of whites, brown pounds of scratch grain; plus \$2.78, the cost of 100 pounds of laying mash, equals \$5.53., divided by two, equals \$2.765, divided by \$0.23\frac{1}{4}, the average egg-feed ratio.

Comparison, Same Week Last 2 Years 1936 1937 Scratch grain*\$1.97 \$1.645 \$2.75 Laying mash* 2.27 1.96 2.78 Feed average* 2.12 1.80 2.765 Eggs, ave. per doz. 0.268 0.224 0.231/4 Egg-feed ratio 7.9 8.0 11.9 * Cost per 100 pounds.

Last week it required 11 9-10 dozen eggs to purchase 100 pounds of feed; in 1936, eight dozen; in 1935, 7 9-10 and worked out readily at 1/2c addozen.

than the same week in 1936 and 3.5c the same week in 1935.

fore, 11.24; one month ago, 10.6. whether the average commercial horn, 19-20. farm flock of 1000 Leghorn birds is making a higher return over feed costs for the same week this year as last, with feed costs sharply higher and egg prices higher, the following year \$67.81. One thousand hens will light weight U. S. Trades: 18-181/2. eat approximately 110 pounds of scratch grain and 110 pounds of lay- on fowl with large sizes not clearing. ing mash per day, or 1540 pounds in seven days. This cost in 1935, \$32.65; in 1936, \$27.72, and this year, \$42.58. It is generally considered that 50 to 60 per cent of the operating expenses are feed costs. In 1935, the return for eggs over feed was \$45.52, in 1936, 3½ lbs. and up, 25-26; 2½ to 3¼ lbs., \$37.61, and this year \$25.23.

Egg Situation and Outlook

The above figures are based on hens

laying 140 eggs per year. If produc-

tion can be stepped up 160 or 180

eggs each year, the income over feed

costs will be materially increased.

HAWKINS MILLION DOLLAR HEN

The mother hen is reproduced by an automatic mechanical hen for the first time in over 1900 years! The cost of brooding chicks is but a fraction of the cost by any other method. Chicks grow naturally, in fresh air, as nature intended. Mortality is exceptionally low, chicks are contented, internal resistance is hardened and chicks develop faster.

Complete Descriptive Catalogue with conclusive evidence that the Hawkins way is the way to NEW poultry profits. Send for it.
