

This map is an overview of important farmlands. It was made by combining information from the published soil survey map to show the relative values, boundaries, and names. This procedure may result in slight misplacement of lines and features in certain areas because the printed and survey maps may have been prepared at different times. The published soil survey map is the official record of the Soil Conservation Service for the State of New Jersey. The published soil survey map is the official record of the Soil Conservation Service for the State of New Jersey. The published soil survey map is the official record of the Soil Conservation Service for the State of New Jersey.
