

**ROAD MAP
OF
THE STATE OF
NEW JERSEY**

From Original Surveys of the N.J. Geological Survey
based on the Triangulation of the U.S. Coast and Geodetic Survey

Scale 5 miles to an inch
MILES

FREDERICK GILKESON 1909 ROBERT A. MEKKER
Commissioner of Public Roads Supervisor of Public Roads

Legend
The heavy red lines indicate improved roads built under the provisions of the State Law, together with some of the unimproved roads built by the local authorities, without State aid. The dotted lines indicate unimproved roads.
Note: The most of these roads are now under the State Road and Turnpike Commission, and many miles of light gravel roads along the Atlantic coast are not indicated.

The map shows a dense network of roads and railroads across the state of New Jersey. Major cities like New York, Philadelphia, and Newark are visible. The map is framed by a grid of latitude and longitude lines. The title block in the top left corner provides the map's title, source, scale, and authors. The legend explains the symbols used for different types of roads and railroads.

Legend
The heavy red lines indicate improved roads built under the provisions of the State Law, together with some of the unimproved roads built by the local authorities, without State aid. The dotted lines indicate unimproved roads.
Note: The most of these roads are shown only in the State of New Jersey and do not extend into the State of Pennsylvania or Delaware.

The map displays a comprehensive network of roads across New Jersey, with major thoroughfares highlighted in red. It includes major cities like New York, Philadelphia, and Trenton, as well as numerous smaller towns and villages. The map also shows the state's coastline, including Long Island Sound and Delaware Bay, and is overlaid with a grid of latitude and longitude lines.

Legend

The heavy red lines indicate improved roads built under the provisions of the State Law, together with some of the unimproved roads built by the local authorities, without State aid. The dotted lines indicate unimproved roads.

Note: The map is a plan of the State, and does not show the actual shape of the State, but only the relative positions of the roads and railroads.

The map shows a dense network of roads and railroads across the state of New Jersey. The roads are represented by lines of varying thickness and color (red for improved, black for unimproved). The railroads are shown as black lines with cross-ticks. The map includes a grid of latitude and longitude lines, with latitude ranging from 39° 00' to 41° 00' N and longitude from 73° 00' to 75° 00' W. Major geographical features like the Delaware Bay and the Atlantic Ocean are labeled. The map is oriented with North at the top.
