

"Among the Igorrotes"

LENGTH, 175 FEET

PRICE, \$19.25

The Igorrotes are a wild, uncivilized tribe, living in the Philippine Islands. They positively refuse to be photographed. Nevertheless our photographer succeeded to take a series of excellent pictures of this strange tribe.

First we see them executing one of their wild *War Dances*. We then watch them preparing their meal. It is well known that the Igorrotes kill dogs, roast them over the wood fire and eat them. It is strange to see how they pour oil over the dog and thus roast it crisp. The meal is not very inviting but the Film is unique in its subject.
