

NATIONAL ACADEMY OF SCIENCES

at Camp Kilmer

In cooperation with the President's Committee for Hungarian Refugee Relief, the National Academy of Sciences-National Research Council has established an office at Camp Kilmer, New Jersey, to help identify and place individuals with advanced scientific or other scholarly or professional training among those arriving from Hungary.

For highly specialized research and academic personnel, it is important to find those positions in the United States which will adequately utilize their talents. It is felt that these relatively few in number if properly placed will make one of the major refugee contributions to the United States.

Upon referral of the refugee to the Academy's office (Building 1305), he is individually interviewed in considerable depth by American scientists, engineers and other qualified professional personnel who speak Hungarian.

The National Academy of Sciences through cooperating resettlement organizations and its own academic and research contacts within the United States endeavors to hand match the especially highly qualified individual with the particular United States institution which can best utilize his services.

Co-Directors of the Program:

Dr. Wallace W. Atwood, Jr.  
Director, Office of International Relations, NAS-NRC

Dr. M. H. Trytten  
Director, Office of Scientific Personnel, NAS-NRC

Administrative Officer at Camp Kilmer:

Mr. E. C. Rowan  
Assistant to the Director  
Office of International Relations, NAS-NRC
