About 75% of this area can be drained by lateral sewers leading to the sewer in Connecticut Ave. between 5th and 6th Ave.

The Low Level area when developed to require sewerage can either be included into future districts for sanitary sewerage, or placed in present collecting system, or placed in separate system of sanitary sewerage.

The proposed sewerage system for the area shown on this map is shown by the lines on this map. The sewerage system is shown by the lines on this map. The sewerage system is shown by the lines on this map.
