Never in the history of Our Nation have farm boys and girls been placed in a position where they can render such a vital service to their country as they can today!

In this hour of danger, when our very existence as a free people is threatened by forces whose avowed intention is to destroy us . . . when every fit man is being called into the armed forces and war industries of the Nation . . . Uncle Sam is asking his sturdy young farm nephews and nieces to enlist for the duration and serve on the farm front . . . right at home.

Your job will be the vitally important one of helping to maintain a high level of farm production . . . food, fiber, fats and oils. You must replace older brothers and hired men, who have gone to serve in other fields where they are needed. There are scrap materials to be gathered, victory gardens to be tended. It’s a big job . . . but it is the one job in which YOU can serve your country best . . . the one in which YOU are needed most.
