Marseille, Sept. 30/18

Dear Mr. Silvers - It is mighty good to get the War Service bulletins from Old Rutgers, even though I've been a long while telling you so.

Even the old grads like to know what the boys are doing and how matters are going on the Raritan. I came over last February for service in the Children's Bureau of the Am. Red Cross, but when the first Roche drive on March 21st began, was glad to respond to the call for help in relieving the refugee situation incident to the evacuation of Amiens.

a month at the front furnished opportunity for establishing a large hospital which I warmed over from a normal school offered to me by the Prefect of the Department of the Aise.

after the refugee situation was cleared up, we converted it into a military hospital & turned it over to the French.

Since then, have been engaged in my proper sphere of medical work, among the children here in Marseille. We have a

sixty bed hospital nearly completed, for the treatment of children up to 3 years of age.

Also four dispensaries in different parts of the city.

This place has truly been called the melting-pot of Europe, and now is the melting-pot of the world. I believe it contains

the greatest variety of perfectly original smells to be found anywhere.

Nevertheless, the climate is good and for two sons you can ride on the tramcar for an hour along the shore of the Mediterranean - Truly a joy to behold. I hadn't been in Marseille two weeks when, in a casual conversation with a young R.C. Ambulance driver, he informed me he was a Rutgers man. Haven't seen him since & I'll be hanged if I can remember his name. He hadn't graduated when we entered the war.

My best thanks for the Bulletin and be sure I look for it.

Kindly remember me to any '95 men you may see. Frank Parker was still in New Brunswick when last I heard of him.

(4)
I haven't seen the Faculty list
in so long, am not sure
which of my own teachers remain
but am quite certain of Dr.
Bevier. Remembers me to him
please and any others of my
former preceptors still at Rutgers.

With kindest regards,

Fraternally yours,

Fred. H. Pierson, '95.

October 19, 1918

Fred H. Pierson,
American Red Cross,
4 Pl. de la Concorde,
Paris, France.

Dear Dr. Pierson:

Your letter of September 30 is very much appreciated. We are always glad to hear from our Rutgers men in France and especially from the men who have been out of college for a considerable time but who have not lost their interest in the Rutgers College.

It must be a source of much inspiration for you to be working in the cause of humanity. We are very proud of our Rutgers men who have given up so much in order to do their part in the struggle which has shaken the world to its foundations. Sometime I hope to have the pleasure of shaking your hand and telling you personally how much we appreciate what you are doing.

Dr. Revier wishes to be remembered to you. Of the other professors who were here during your college days, Poppy Van Dyke, Dr. Scott and Dr. Titsworth are still with us. Poppy is now Professor Emeritus, and only last week was taken with a severe illness and will probably be unable to teach for many months. But Dr. Titsworth is still actively at the head of the engineering department.

I hope that amid the pressure of your many duties you will find a few minutes in which to write to us.

Sincerely yours,
