

June 6, 1918

The Engineering Council,
29 West 39th St.,
New York, N.Y.
Room 903

Gentlemen:

Mr. Harry B. Smith of Plainfield, N.J., is, I understand, making application for a commission in the Engineers. I have no hesitancy in recommending Mr. Smith most highly. He has received his Bachelor of Science degree in Engineering from Rutgers College, and has done well in his special field since graduation. He has qualities of leadership and is, I believe, well fitted for the position he seeks.

Sincerely yours,

FRS/W

Assistant to the President.
