General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

General Permit - Category I2 NJPDES Permit No. NJ0108642 Ground Water	Statewide All Municipalities Statewide	June Gazek Bureau of Nonpoint Pollution Control (609) 633-7021	Statewide II-A	This general NJPDES-Discharge to Ground Water (DGW) permit is being renewed with some changes. This permit applies specifically to active potable water treatment plant facilities who, as part of their treatment process, are removing excess iron and manganese which is frequently elevated in raw water supplies. The facilities who are eligible for this general permit treat their water as described above and discharge their filter backwash/clarifier water to on-site basins. The renewal permit proposes the following major changes: a consolidation of the 4 monitoring programs into 2 monitoring programs; changing the monitoring program frequency from semi-annual to annual. Most facilities will have a decrease in monitoring, except for those currently in monitoring program 3 who will sample annually for the trihalomethane compounds. Existing data collected over the previous 5 years suggests a wide variation needing further additional data for comparison.
Franklin Burlington Plastic NJPDES Permit No. NJ0130508 Storm Water	113 Passaic Ave Kearny, NJ Hudson County	Eline Megalla Bureau of Nonpoint Pollution Control (609) 633-7021	Passaic River SE3 02030103150	This is a Revoke and Reissue permit action for Spartech - Franklin Plastic (Spartech) . PUBLIC NOTICE AND STATEMENT OF BASIS

Notice is hereby given that the New Jersey Department of Environmental Protection (Department), Site Remediation Program, proposes to restrict and control the discharge of pollutants from Ecolab Inc., 255 Blair Road, Avenel, Woodbridge Township, Middlesex County.

The Ecolab facility is located at the intersection of Blair Road and Homestead Avenue in Woodbridge Township, Middlesex County. Ecolab manufactures cleaning and sanitizing products, with active ingredients consisting of caustics and oxidizers. Historically, the facility used solvents as ingredients in a few of the cleaning products; however, the facility no longer manufactures or distributes solvent-based products. The facility serves as a distribution facility and warehoused finished bulk products.

A ground-water remediation system shall be installed that will treat chlorobenzene and dichlorobenzene isomers migrating from the up-gradient Ecolab facility onto the Procter & Gamble Company property that is located directly down-gradient (to the west) of the Ecolab facility.

Monthly, 250 gallons of contaminant degrading microbial population grown from site ground water shall be injected along with 125 gallons of basic nutrients consisting of diammonium phosphate, dipotassium phosphate, monopotassium phosphate, urea and ammonium sulfate, for use in the accelerated bio-degradation of dichlorobenzene isomers and chlorobenzene in ground water. The injections shall occur on the Procter & Gamble Company property within the area where the chlorobenzene and dichlorobenzene isomers are migrating from the Ecolab facility.

Oxygen shall be created in-situ via the hydration of calcium peroxide (PermeOx) in a one-time injection in a slurry form into the subsurface. The one-time injection shall be completed to bedrock (approximately 16-20' below ground surface), and consist of 15 injection points per row and a total of 5 rows, with a density of PermeOx of 5.5 pounds per foot. The total amount injected shall be a maximum 4,000 pounds of PermeOx. Additionally, six (6) 1-inch Schedule 40 PVC injection points shall be installed using direct push technology to facilitate injection of the nutrients and microbes into the subsurface.

The nutrient mixture shall consist of approximately two pounds of each of the following: diammonium phosphate, dipotassium phosphate, monopotassium phosphate, urea and ammonium sulfate, with trace elements approximately 1/10th of 1 pound. Concentrations of all nutrients shall be less than one part per million, with trace elements including metals at less than 1 part per trillion, once injected into the aquifer. Each site microbe injection shall consist of 250 gallons of microbes cultured from existing site ground water and grown on the same nutrients and oxygen as listed above. Injections shall utilize the six (6) installed 1-inch Schedule 40 piezometers described above, and shall occur monthly.

This notice is being given to inform the public that the Department has prepared a draft of the NEW JERSEY POLLUTANT DISCHARGE ELIMINATION SYSTEM / DISCHARGE TO GROUND WATER (NJPDES/DGW) permit (NJPDES NO. NJ8000191), in accordance with the provisions of the

General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

PUBLIC NOTICE AND STATEMENT OF BASIS

Notice is hereby given that the New Jersey Department of Environmental Protection (Department), Site Remediation Program, proposes to restrict and control the discharge of pollutants from Ecolab Inc., 255 Blair Road, Avenel, Woodbridge Township, Middlesex County.

The Ecolab facility is located at the intersection of Blair Road and Homestead Avenue in Woodbridge Township, Middlesex County. Ecolab manufactures cleaning and sanitizing products, with active ingredients consisting of caustics and oxidizers. Historically, the facility used solvents as ingredients in a few of the cleaning products; however, the facility no longer manufactures or distributes solvent-based products. The facility serves as a distribution facility and warehoused finished bulk products.

A ground-water remediation system shall be installed that will treat chlorobenzene and dichlorobenzene isomers migrating from the up-gradient Ecolab facility onto the Procter & Gamble Company property that is located directly down-gradient (to the west) of the Ecolab facility.

Monthly, 250 gallons of contaminant degrading microbial population grown from site ground water shall be injected along with 125 gallons of basic nutrients consisting of diammonium phosphate, dipotassium phosphate, monopotassium phosphate, urea and ammonium sulfate, for use in the accelerated bio-degradation of dichlorobenzene isomers and chlorobenzene in ground water. The injections shall occur on the Procter & Gamble Company property within the area where the chlorobenzene and dichlorobenzene isomers are migrating from the Ecolab facility.

Oxygen shall be created in-situ via the hydration of calcium peroxide (PermeOx) in a one-time injection in a slurry form into the subsurface. The one-time injection shall be completed to bedrock (approximately 16-20' below ground surface), and consist of 15 injection points per row and a total of 5 rows, with a density of PermeOx of 5.5 pounds per foot. The total amount injected shall be a maximum 4,000 pounds of PermeOx. Additionally, six (6) 1-inch Schedule 40 PVC injection points shall be installed using direct push technology to facilitate injection of the nutrients and microbes into the subsurface.

The nutrient mixture shall consist of approximately two pounds of each of the following: diammonium phosphate, dipotassium phosphate, monopotassium phosphate, urea and ammonium sulfate, with trace elements approximately 1/10th of 1 pound. Concentrations of all nutrients shall be less than one part per million, with trace elements including metals at less than 1 part per trillion, once injected into the aquifer. Each site microbe injection shall consist of 250 gallons of microbes cultured from existing site ground water and grown on the same nutrients and oxygen as listed above. Injections shall utilize the six (6) installed 1-inch Schedule 40 piezometers described above, and shall occur monthly.

This notice is being given to inform the public that the Department has prepared a draft of the NEW JERSEY POLLUTANT DISCHARGE ELIMINATION SYSTEM / DISCHARGE TO GROUND WATER (NJPDES/DGW) permit (NJPDES NO. NJ8000191), in accordance with the provisions of the

New Jersey "Water Pollution Control Act" (N.J.S.A. 58:10A-1 et seq.), its implementing regulations (N.J.A.C. 7:14A-1 et seq.), and the Ground Water Quality Standards (N.J.A.C. 7:9-6 et seq.).

The implementation of the New Jersey Pollutant Discharge Elimination System requirements are the enforcement mechanism by which pollutant discharges are brought into conformance and compliance with laws, regulations and standards.

The pollution control requirements are those conditions necessary to restrict the discharge of pollutants and protect the public health and the environment.

Copies of the draft permit have been sent to the Mayor, Municipal Clerk, Planning Board, Sewerage Authority, Health Officer, and Environmental Commission of Woodbridge Township, Middlesex County.

The draft document prepared by the Department is based on the administrative record which is on file at the offices of the Department, Site Remediation Program, located at 401 East State Street in the City of Trenton, Mercer County, New Jersey. It is available for inspection, by appointment, between 8:30 A.M. and 4:00 P.M., Monday through Friday. Information regarding appointments for inspection may be scheduled by calling Central File at (609) 292-0400.

Interested persons may submit written comments on the draft permit to the Assistant Director, Discharge Response Element, P.O. Box 028, 401 East State Street, Trenton, New Jersey, 08625-0028. All comments shall be submitted within 30 days of the date of this public notice. All persons, including the owner or operator, who believe that any condition set forth in this document is inappropriate, must raise all reasonably ascertainable issues and submit in writing to the Department all reasonably available arguments and factual grounds supporting their position, including all supporting material, by the close of the public comment period. All comments submitted by interested persons in response to this notice, within the public comment period, will be considered by the Department with respect to the requirements being applied to this facility. After the close of the public comment period, the Department will make a final decision. The Department will respond to all significant and timely comments when a final decision is made. The owner or operator and each person who has submitted written comments will receive notice of Department's final decision.

Any interested person may request in writing that the Department holds a nonadversarial public hearing on the draft document. This request shall state the nature of the issues to be raised in the proposed hearing and shall be submitted within 30 days of the date of this public notice to the Assistant Director, Discharge Response Element, at the address cited above. The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

PUBLIC NOTICE

Notice is hereby given that the New Jersey Department of Environmental Protection (the Department) intends to issue a generic TREATMENT WORKS APPROVAL (TWA) Number 02-3487-4SG, in accordance with N.J.A.C. 7:9A-3.9.

On August 5, 2002, N.J.A.C. 7:50 was amended to allow for an Alternative Design Treatment Systems Pilot Program. The purpose of that five-year program is to assess five different alternative technologies designed to reduce nitrogen loadings from septic systems. The Ashco RFS III system will be permitted for use on lots as small as 1.5 acres. The following four technologies will be permitted for use on lots as small as one acre: Amphidrome Sequencing Batch Reactors, AWT Environmental Trickling Filters, Bio-Microbics FAST, Cromoglass Sequencing Batch Reactors. Since these systems are outside the design specifications of N.J.A.C. 7:9A, they are required to obtain a TWA. The Department is issuing this generic TWA to facilitate the approval process so that the Pinelands Commission is given adequate time to complete its pilot program.

The Department is satisfied that these systems will function as well as or better than conventional onsite wastewater treatment and disposal systems. In addition, the Department is satisfied that the Pinelands pilot program will ensure adequate maintenance and inspection for these systems. Only those proprosed projects under the jurisdiction of the Pinelands Commission are eligible for approval under this TWA.

The administrative record for the draft generic TWA is available for inspection at the offices of the Department, Bureau of Nonpoint Pollution Control (BNPC) at 401 East State Street, in the City of Trenton, Mercer County, New Jersey. It is available for inspection between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday, by appointment. Questions regarding the TWA or appointments for inspection of the file may be scheduled by calling BNPC at (609)-633-7021 or (609) 292-0407. Copies of the administrative record may be obtained upon payment of the Department's normal charges for copies by contacting the Department.

Interested persons may submit written comments within 30 days of the date of this public notice to the following address: New Jersey Department of Environmental Protection, Division of Water Quality, Bureau of Nonpoint Pollution Control, P.O. Box 029, Trenton, NJ 008625-0029, Attn: Pinelands TWA.

All comments submitted during the comment period will be considered by the Department in making a final decision. The Department will respond to all significant and timely comments when a final decision is issued. The applicant, and each person who has submitted comments, will receive written notice of the Department's final decision.

Septage, food processing residuals, non-hazardous bulk liquid materials, and liquid residuals generated in the treatment of potable water and domestic wastewater are currently stored, consolidated, and/or dewatered at the facility prior to being managed off-site at NJDEP approved in-state sludge management sites and/or at duly permitted/legal sites located outside of New Jersey.
General Permit. - Phragmites Reed Bed Sludge Management System NJPDES Permit No. NJ0132501 General Permit - Category 4G	NJDEP Division of Water Quality	Ruth Anne Rosenberg Bureau of Pretreatment & Residuals (BPR) (609) 633-3823	NA	This general permit is a re-draft of the June 6, 2001 draft general permit, and incorporates changes to address significant public comments. This new draft general permit proposes to incorporate process and monitoring requirements for the Phragmites reed bed sludge management system. Sewage sludge from the treatment of sanitary wastewater is discharged to basins in which the reed bed grass Phragmites, or similar species, is cultivated to facilitate the sludge drying and treatment process. The Department has determined that this category requires similar monitoring and operating conditions, and is more appropriately regulated under a general permit than under individual permits. If finalized, the general permit will not supercede any existing permits that a Phragmites reed bed sludge management facility may currently possess. All Phragmites reed bed sludge management facilities with existing NJPDES permits will be encouraged to apply for and obtain the general permit, but will have the right to retain their individual permit until permit expiration.

This application is for a renewal of a consolidated NJPDES permit. This existing facility discharges an average of 0.006 mgd of stormwater runoff and a maximum of 1.2 mgd of process wastewater. Process wastewater consists of the following: tank hydrostatic test water; pipeline hydrostatic test water; washdown slab water; and proverloop calibration meter water. The above process wastewater/stormwater discharges to retention basin #1. The overflow from retention basin #1 discharges to the Woodbridge Creek, via an unnamed waterway, through outfall DSN 002A. The permittee also discharges an average of 0.006 mgd of stormwater and intermittently discharges hydrostatic test water (a maximum of 1.5 mgd) to retention basin #2. The overflow from the retention basin #2 also discharges to the Woodbridge Creek, via the same unnamed waterway, through outfall DSN 003A. The above noted process wastewater and stormwater is treated by a series of oil/water separators prior to discharge to the retention basins.

Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
DIVISION OF WATER QUALITY
PUBLIC NOTICE

Notice is hereby given that the New Jersey Department of Environmental Protection (the Department) intends to issue a generic TREATMENT WORKS APPROVAL (TWA) Number 02-3487-4SG, in accordance with N.J.A.C. 7:9A-3.9.

On August 5, 2002, N.J.A.C. 7:50 was amended to allow for an Alternative Design Treatment Systems Pilot Program. The purpose of that five-year program is to assess five different alternative technologies designed to reduce nitrogen loadings from septic systems. The Ashco RFS III system will be permitted for use on lots as small as 1.5 acres. The following four technologies will be permitted for use on lots as small as one acre: Amphidrome Sequencing Batch Reactors, AWT Environmental Trickling Filters, Bio-Microbics FAST, Cromoglass Sequencing Batch Reactors. Since these systems are outside the design specifications of N.J.A.C. 7:9A, they are required to obtain a TWA. The Department is issuing this generic TWA to facilitate the approval process so that the Pinelands Commission is given adequate time to complete its pilot program.

The Department is satisfied that these systems will function as well as or better than conventional onsite wastewater treatment and disposal systems. In addition, the Department is satisfied that the Pinelands pilot program will ensure adequate maintenance and inspection for these systems. Only those proprosed projects under the jurisdiction of the Pinelands Commission are eligible for approval under this TWA.

The administrative record for the draft generic TWA is available for inspection at the offices of the Department, Bureau of Nonpoint Pollution Control (BNPC) at 401 East State Street, in the City of Trenton, Mercer County, New Jersey. It is available for inspection between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday, by appointment. Questions regarding the TWA or appointments for inspection of the file may be scheduled by calling BNPC at (609)-633-7021 or (609) 292-0407. Copies of the administrative record may be obtained upon payment of the Department's normal charges for copies by contacting the Department.

Interested persons may submit written comments within 30 days of the date of this public notice to the following address: New Jersey Department of Environmental Protection, Division of Water Quality, Bureau of Nonpoint Pollution Control, P.O. Box 029, Trenton, NJ 008625-0029, Attn: Pinelands TWA.

All comments submitted during the comment period will be considered by the Department in making a final decision. The Department will respond to all significant and timely comments when a final decision is issued. The applicant, and each person who has submitted comments, will receive written notice of the Department's final decision.

NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
DIVISION OF WATER QUALITY
PUBLIC NOTICE

Notice is hereby given that the New Jersey Department of Environmental Protection (the Department) intends to issue a generic TREATMENT WORKS APPROVAL (TWA) Number 02-3487-4SG, in accordance with N.J.A.C. 7:9A-3.9.

On August 5, 2002, N.J.A.C. 7:50 was amended to allow for an Alternative Design Treatment Systems Pilot Program. The purpose of that five-year program is to assess five different alternative technologies designed to reduce nitrogen loadings from septic systems. The Ashco RFS III system will be permitted for use on lots as small as 1.5 acres. The following four technologies will be permitted for use on lots as small as one acre: Amphidrome Sequencing Batch Reactors, AWT Environmental Trickling Filters, Bio-Microbics FAST, Cromoglass Sequencing Batch Reactors. Since these systems are outside the design specifications of N.J.A.C. 7:9A, they are required to obtain a TWA. The Department is issuing this generic TWA to facilitate the approval process so that the Pinelands Commission is given adequate time to complete its pilot program.

The Department is satisfied that these systems will function as well as or better than conventional onsite wastewater treatment and disposal systems. In addition, the Department is satisfied that the Pinelands pilot program will ensure adequate maintenance and inspection for these systems. Only those proprosed projects under the jurisdiction of the Pinelands Commission are eligible for approval under this TWA.

The administrative record for the draft generic TWA is available for inspection at the offices of the Department, Bureau of Nonpoint Pollution Control (BNPC) at 401 East State Street, in the City of Trenton, Mercer County, New Jersey. It is available for inspection between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday, by appointment. Questions regarding the TWA or appointments for inspection of the file may be scheduled by calling BNPC at (609)-633-7021 or (609) 292-0407. Copies of the administrative record may be obtained upon payment of the Department's normal charges for copies by contacting the Department.

Interested persons may submit written comments within 30 days of the date of this public notice to the following address: New Jersey Department of Environmental Protection, Division of Water Quality, Bureau of Nonpoint Pollution Control, P.O. Box 029, Trenton, NJ 008625-0029, Attn: Pinelands TWA.

All comments submitted during the comment period will be considered by the Department in making a final decision. The Department will respond to all significant and timely comments when a final decision is issued. The applicant, and each person who has submitted comments, will receive written notice of the Department's final decision.

Corrugated Paper Group Inc. NJPDES Permit No. NJ0031372 DSW Minor	623 Riegelsville Rd Holland, NJ 08848 Hunterdon County	Jeff Thein Bureau of Point Source Permitting Region 1 (609) 633-3869	Delaware River Zone 1E Central Delaware	This application is for a renewal of a NJPDES permit to discharge an average of 0.018 MGD of untreated industrial wastewater.
Tingley Rubber Corporation NJPDES Permit No. NJ0109631 Ground Water	200 South Ave. South Plainfield Boro, NJ Middlesex County	Matt Klewin Bureau of Nonpoint Pollution Control (609) 633-7021	II-A	This is a permit renewal. This facility is a 120,000 square foot warehouse/manufacturing building. Tingley Rubber Corp. manufactures rubber boots. They currently have thirty eight employees. The facility is on a 26.92 acre site. Sanitary wastewater from the front offices is discharged to an existing subsurface disposal system. The sanitary wastewater generated by the rest of the facility is commingled with the industrial wastewater. On an annual basis the facility replaces the bromine solution which it uses to acid wash the rubber footwear. The solution is pumped to an above ground holding tank. The decant is pumped to the sewage treatment plant . The solids from the holding tank are disposed of at a municipal landfill. The sanitary wastewater and the decant from the bromine tank are discharged to a settling tank. The treated wastewater is then pumped to a sodium hypochlorite tank, then through a series of bag filters. The industrial wastewater from the floor drains, backwash from the bromine rinse waterfilters, boiler blowdown and the decant from the soapy contact rinse water is run through an oil/water seperator before it is commingled with the treated sanitary wastewater. The commingled sanitary/industrial wastewater is then discharged to a lined surface impoundment where it is treated with sodium hydroxide. The wastewater then passes through discharge point DSN-002 before entering a tributary of Dismal Swamp. The discharge monitoring point DSN-002 is regulated under NJPDES DSW-No. NJ0020672. The existing infiltration/percolation lagoon was taken out of service when the discharge was diverted to the surface impoundment.

Transfer Print Foils Inc NJPDES Permit No. NJ0073857 Storm Water	9 Cotters Lane East Brunswick Twp., NJ Middlesex County	Eric Sussman Bureau of Nonpoint Pollution Control (609) 633-7021	Sawmill Brook FW2-NT 02030105130	The applicant has applied for a New Jersey Pollutant Discharge Elimination (NJPDES) permit renewal to the New Jersey Department of Environmental Protection (NJDEP), Bureau of Nonpoint Pollution Control, permit number NJ0073857. The applicant is involved with the coating of polyester film. The Standard Industrial Classification (SIC) code is 3497. The facility maintains bulk storage tanks for its industrial operation. This consists of 7 above ground storage tanks (AGSTs) that are roofed and have secondary containment. The 7 SGSTs are as follows: two- (2) 6000 gal. MIBK tanks, one - (1) 6000 gal. Hazardous waste tank, four - (4) 10,00 gal. Tanks separately containing Toluene, Acetone, Ethanol and NEK. There is one main outfall (DSN001) that discharges stormwater from the site's subsurface stormwater collection system. A second outfall (DSN002) is an emergency discharge from the secondary containment area. This outfall will only discharge if a fire occurs and the secondary containment is breached from fire fighting activities. The discharge from DSN002 is water pumped through a portable pump and into the facility's stormwater collection system and ultimately discharging from DSN001 during a fire emergency. The existing permit regulates stormwater discharges to the Sawmill Brook a tributary of Lawrence Brook and the Raritan River classified as FW2-NT.

The HRC\ORC treatment technology is intended to breakdown the volatile organic compounds via in-situ anaerobic bioremediation. Injection of HRC will occur at fifteen locations spaced ten feet apart in the area of Tank Farm #1 and site ground water monitoring well MW2. The HRC treatment will be supplemented by the injection of ORC along the downgradient edge of the HRC treatment zone. Injection of the ORC is proposed to accelerate the degradation of benzene and other constituents that may not be fully degraded in the anaerobic HRC treatment zone. The ORC will be injected at five locations on ten foot centers approximately ten feet downgradient of the HRC treatment zone. The HRC\ORC injection depths will be from the water table (approximately 1.5 feet below the ground surface) to the top of the first clay layer (approximately 4 to 5 feet below the ground surface). Up to 25 pounds of HRC will be injected at each HRC injection location and up to 15 pound of ORC will be injected at each of the 5 ORC injection locations. The projected duration of the HRC\ORC applications is one year.

PUBLIC NOTICE

Notice is hereby given that the New Jersey Department of Environmental Protection (the Department) has issued a generic TREATMENT WORKS APPROVAL (TWA) Number 02-3487-4SG, in accordance with N.J.A.C. 7:9A-3.9. This generic TWA was first noticed for public comment on August 14, 2002 and the public comment period was closed on September 28, 2002. No significant comments were received during the public comment period, however minor changes to clarify the language of the draft generic TWA have been made. The intent of the document has not been changed by these minor clarifications.

On August 5, 2002, N.J.A.C. 7:50 was amended to allow for an Alternative Design Treatment Systems Pilot Program. The purpose of that five-year program is to assess five different alternative technologies designed to reduce nitrogen loadings from septic systems. The Ashco RFS III system will be permitted for use on lots as small as 1.5 acres. The following four technologies will be permitted for use on lots as small as one acre: Amphidrome Sequencing Batch Reactors, AWT Environmental Trickling Filters, Bio-Microbics FAST, Cromoglass Sequencing Batch Reactors. Since these systems are outside the design specifications of N.J.A.C. 7:9A, they are required to obtain a TWA. The Department is issuing this generic TWA to facilitate the approval process so that the Pinelands Commission is given adequate time to complete its pilot program.

The Department is satisfied that these systems will function as well as or better than conventional onsite wastewater treatment and disposal systems. In addition, the Department is satisfied that the Pinelands pilot program will ensure adequate maintenance and inspection for these systems. Only those proposed projects under the jurisdiction of the Pinelands Commission are eligible for approval under this TWA.

The administrative record for the generic TWA is available for inspection at the offices of the Department, Bureau of Nonpoint Pollution Control (BNPC) at 401 East State Street, in the City of Trenton, Mercer County, New Jersey. It is available for inspection between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday, by appointment. Questions regarding the TWA or appointments for inspection of the file may be scheduled by calling BNPC at (609)-633-7021 or (609) 292-0407. Copies of the administrative record may be obtained upon payment of the Department's normal charges for copies by contacting the Department.

In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
DIVISION OF SOLID AND HAZARDOUS WASTE
PUBLIC NOTICE

Notice is hereby given that the New Jersey Department of Environmental Protection, Division of Solid and Hazardous Waste has tentatively approved an application made by the Pollution Control Financing Authority of Camden County to renew their Solid Waste Facility Permit to operate an existing sanitary landfill in accordance with N.J.A.C. 7:26-1 *et seq.* and by authority of N.J.S.A. 13:1E-1 *et seq.*

The landfill is located at 9600 River Road in Pennsauken Township, Camden County. The landfill is owned and operated by the Pollution Control Financing Authority of Camden County, located at 729 Hylton Road, Pennsauken, New Jersey. This landfill is a state-of-the-art, double composite lined facility. The flow of waste to the landfill is limited due to the operation of the Camden County Resource Recovery Facility. Incinerator ash is not disposed of at the landfill. Some by-pass waste is handled when the incinerator reaches capacity or is down for repairs. The Intermediate Processing Facility (IPF) building was originally used as a solid waste baler facility. Now it serves as a vehicle maintenance area and as a tire chipping area for a research, development and demonstration (RD&D) project.

The permit action prepared by the Department is based on the administrative record that is on file at the offices of the Department, Division of Solid and Hazardous Waste, Office of Permitting and Technical Programs, located at 401 E. State Street in the City of Trenton, Mercer County, New Jersey. It is available for inspection, by appointment, Monday through Friday, between 9:00 A.M. and 4:00 P.M. Appointment for inspection may be made in writing to the Office of Permitting and Technical Programs, by fax at (609) 633-9839 or by calling (609) 984-5950. Requests should be made to the attention of Ms. Rebecca Croke, file custodian. Copies of the tentative approval and the project fact sheet are also available for review at that office and the office of Pat Gudis, Pennsauken Township Clerk, located at 5605 N. Crescent Blvd., Pennsauken, New Jersey, 08110.

Comments on the tentative approval or a request that the Department hold a non-adversarial public hearing must be submitted in writing to the person specified below during the public comment period which begins on the date of the publication of this notice and closes on December 22, 2002.

All interested persons, including the applicant, who believe any aspect of the tentative approval is inappropriate shall raise all reasonably ascertainable issues and submit all reasonably available arguments and factual grounds supporting their position, including all supporting material, by the close of the public comment period. All supporting materials shall be included in full and may not be incorporated by reference, unless they are already part of the administrative record in the same proceeding, or consist of State or Federal statutes and regulations or other generally available reference materials.

Any interested person who reasonably requires additional time within which to supplement the administrative record should request, in writing, an extension of the public comment period, and the Department will exercise reasonable discretion in setting the closing date for public comment. The Department will publish subsequent notice of any decision to extend the period for public comment. Any notice of an extension of the public comment period will clearly set forth the closing date of such extension.

If any request for a public hearing, in the opinion of the Department, raises significant issues of fact relevant to the proposed agency action during the public comment period, a public hearing will be scheduled regarding the proposed agency action. The Department will publish subsequent notice of a scheduled hearing.

The Department will respond to all relevant comments submitted during the public comment period. These comments and the Department's responses will be set forth in a response document which will become part of the administrative record upon which the Department will base its final decision. Any person who has submitted relevant written comments will receive notification of the Department's final decision.

Written comments should be submitted to:

NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
DIVISION OF WATER QUALITY
PUBLIC NOTICE

Notice is hereby given that the New Jersey Department of Environmental Protection (the Department) intends to issue a generic TREATMENT WORKS APPROVAL (TWA) Number 02-3487-4SG, in accordance with N.J.A.C. 7:9A-3.9.

On August 5, 2002, N.J.A.C. 7:50 was amended to allow for an Alternative Design Treatment Systems Pilot Program. The purpose of that five-year program is to assess five different alternative technologies designed to reduce nitrogen loadings from septic systems. The Ashco RFS III system will be permitted for use on lots as small as 1.5 acres. The following four technologies will be permitted for use on lots as small as one acre: Amphidrome Sequencing Batch Reactors, AWT Environmental Trickling Filters, Bio-Microbics FAST, Cromoglass Sequencing Batch Reactors. Since these systems are outside the design specifications of N.J.A.C. 7:9A, they are required to obtain a TWA. The Department is issuing this generic TWA to facilitate the approval process so that the Pinelands Commission is given adequate time to complete its pilot program.

The Department is satisfied that these systems will function as well as or better than conventional onsite wastewater treatment and disposal systems. In addition, the Department is satisfied that the Pinelands pilot program will ensure adequate maintenance and inspection for these systems. Only those proprosed projects under the jurisdiction of the Pinelands Commission are eligible for approval under this TWA.

The administrative record for the draft generic TWA is available for inspection at the offices of the Department, Bureau of Nonpoint Pollution Control (BNPC) at 401 East State Street, in the City of Trenton, Mercer County, New Jersey. It is available for inspection between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday, by appointment. Questions regarding the TWA or appointments for inspection of the file may be scheduled by calling BNPC at (609)-633-7021 or (609) 292-0407. Copies of the administrative record may be obtained upon payment of the Department's normal charges for copies by contacting the Department.

Interested persons may submit written comments within 30 days of the date of this public notice to the following address: New Jersey Department of Environmental Protection, Division of Water Quality, Bureau of Nonpoint Pollution Control, P.O. Box 029, Trenton, NJ 008625-0029, Attn: Pinelands TWA.

All comments submitted during the comment period will be considered by the Department in making a final decision. The Department will respond to all significant and timely comments when a final decision is issued. The applicant, and each person who has submitted comments, will receive written notice of the Department's final decision.

Elwood Elementary/Middle Sch NJPDES Permit No. NJ0088340 Ground Water	Union and Elm Ave Mullica Twp., NJ Atlantic County	Greg Chin Bureau of Nonpoint Pollution Control (609) 633-7021	I-PL (Protection Area)	This is a draft renewal permit for the Mullica Township Elwood Elementary/Middle School . The current population is about 850 students with a design capacity population of 1,104 and a design flow of 12,500 gallons per day. This design flow was based on existing per capita data and a 200% safety factor. Sanitary wastewater is treated to meet the Drinking Water Quality Standards for all parameters of concern, except fecal coliform. Although UV disinfection is provided, unsaturated native soils beneath the four subsurface disposal areas are utilized to achieve GWQS for fecal coliform bacteria. Each disposal bed is 4,800 square feet with a total area of 19,200 square feet. Four monitor wells are sampled quarterly to demonstrate compliance with the Ground Water Quality Standards at the downgradient property boundary.
Hmf Property NJPDES Permit No. NJ0134821 Ground Water	1-6 Holmdel Farm Road Holmdel Twp., NJ Monmouth County	Keith Howell Bureau of Nonpoint Pollution Control (609) 633-7021	II-A	This is a draft permit application denial. HMF Associates was a proposed 900,000 sq. ft. office complex. During the public comment period on the draft NJPDES-DGW permit, commentors correctly indicated that the consistency determination was in conflict with the Department's rules at N.J.A.C. 7:15, which were in effect at the time of that decision, and with previous application of those rules. Specifically, the project's design flow of 90,000 gpd , and not the actual discharge flow of 19,931 gpd, should have been used to determine the applicability of N.J.A.C. 7:15-5.1. This section states that a domestic treatment works that requires a NJPDES discharge permit and that has a design capacity of 20,000 gpd or larger requires an amendment to a wastewater management plan.
Crossroads At Oldwick NJPDES Permit No. NJ0104396 Ground Water	Route 523 (Oldwick Road) Tewksbury Twp., NJ Hunterdon County	Brian Sage Bureau of Nonpoint Pollution Control (609) 633-7021	II-A	The proposed project consists of an expansion of the original proposal from 40 units to a maximum of 75 single family dwelling units, treatment plant and subsurface disposal fields. The design flow for the facility, based upon N.J.A.C. 7:14A-23.3(a), is 22,500 gallons per day (75 3 bedroom or larger units @ 300 gpd/unit). The wastewater is proposed to be treated to groundwater quality standards prior to disposal to subsurface disposal fields. The treated effluent will be discharged to two subsurface disposal beds providing a total of 49,600 ft2 of infiltrative area. Disposal area 1 shall provide a minimum of 39,600 ft2 of disposal area, and shall receive a maximum discharge of 15,000 gpd (maximum loading rate of 0.38 gpd/ft2). Disposal area 2 shall provide a minimum of 10,000 ft2 of disposal area, and shall receive a maximum discharge of 7,500 gpd (maximum loading rate of 0.75 gpd/ft2). The flow from the facility shall be limited to a maximum of 22,500 gpd. Residuals generated in the treatment process shall be periodically removed from the primary settling tank to an approved residual management facility.

Little Hill Foundation NJPDES Permit No. NJ0141569 Ground Water	61 Wards Road Hardwick Twp., NJ Warren County	Brian Sage Bureau of Nonpoint Pollution Control (609) 633-7021	II-A	The proposed project consists of an existing 60 bed alcohol addiction recovery facility proposing to expand to a 90 bed capacity. The facility also includes a cafeteria, meeting rooms and administrative offices. Laundry generated from the facility is processed off-sire by a professional laundry service. The design flow for the facility, based upon N.J.A.C. 7:9A-7.4(d), is 13,500 gallons per day (90 beds @ 150 gpd/bed). The wastewater is proposed to be treated to groundwater quality standards prior to disposal to a subsurface disposal system. The treated effluent will be discharged to two subsurface disposal beds providing a total of 34,650 ft2 of infiltrative area. The flow from the facility shall be limited to a maximum of 13,500 gpd. Residuals generated in the treatment process shall be periodically removed from the primary settling tank to an approved residual management facility.
Landis Sewerage Authority NJPDES Permit No. NJ0025364 Ground Water	1776 S. Mill Road Vineland City, NJ Cumberland County	Brian Sage Bureau of Nonpoint Pollution Control (609) 633-7021	II-A	This major modification to the NJPDES-DGW permit incorporates the requirements for beneficial reuse of the treated wastewater. The modification establishes limitations for Total Suspended Solids, Fecal Coliform, Total Residual Chlorine and Turbidity in order to reuse the treated effluent in areas with unrestricted public access. Upon review of the Landis Sewerage Authority (Landis) effluent data the Department has determined that Landis has the technical ability to satisfy the high-level treatment requirements for public access beneficial reuse. Therefore, when Landis directs their effluent to an authorized reuse location, the effluent limitations for public access beneficial reuse identified in this permit shall be met and additionally, the limitations and monitoring conditions outlined in the permit shall be applicable.
Colts Neck High School NJPDES Permit No. NJ0109355 Ground Water	Five Points Rd. & Route 537 Colts Neck Twp., NJ Monmouth County	Ron Bannister Bureau of Nonpoint Pollution Control (609) 633-7021	II-A	This is a renewal NJPDES--DGW permit for Colts Neck High School. Colts Neck High School is an existing high school serving grades 9 through 12. The functional capacity of the school, including students and staff is 1,390 people. The school includes a cafeteria, gymnasium, science laboratories, and art and home management training facilities. The sanitary wastewater design flow from the school is approximately 32,500 gpd. However, the school utilizes a wastewater recycling and treatment system that recycles the majority of the wastewater through the school's toilets. Because the majority of the wastewater is recycled, the treatment system has been designed to discharge only 6,000 gpd of effluent to ground water. Two subsurface disposal beds totaling 13,600 square feet are utilized to dispose of the effluent. All residuals generated by the facility are managed off-site at an approved residuals management facility.
Cape May County MUA NJPDES Permit No. NJ0059986 Residuals Permit (Category V) Renewal	PO Box 610 Cape May Court House, NJ 08210 Cape May County	Ruth Anne Rosenberg Bureau of Pretreatment & Residuals (609) 633-3823	NA	The permittee has applied to the State of New Jersey to obtain authorization to continue to operate an existing 20 dry ton/18.14 dry metric tons per day in-vessel/aerated curing pile sewage sludge composting facility and to continue to distribute the resultant marketable residual product. The NJDEP intends to renew this permit in accordance with the New Jersey Pollutant Discharge Elimination System regulations N.J.A.C. 7:14A, and by the authority of the Water Pollution Control Act, N.J.S.A. 58:10A-1 et seq.

Arrow Group Industries NJPDES Permit No. NJ0141259 SIU	Third Ave Wanaque, NJ 07420 Passaic County	Gary Torres Bureau of Pretreatment and Residuals (609) 633-3823	Wanaque Valley Regional Sewerage Authority Sewage Treatment Plant	This application is for a new NJPDES permit to discharge an average of 19,000 gallons daily of pretreated industrial wastewater, subject to the Federal Categorical Pretreatment Standards for Coil Coating (40 CFR 465). Greenwich Township WTP NJPDES Permit No. NJ0130273 SIU	1200 Memorial Ave. Greenwich Twp., NJ Gloucester County	Gary Torres Bureau of Pretreatment and Residuals (609) 633-3823	Greenwich Township Sewage Treatment Plant	This is a NJPDES permit modification to regulate an existing discharge. The applicant operates potable water treatment plants, SIC Code 4941. Potable water is treated to remove iron and manganese, which are filtered out. The discharge to Greenwich Township Sewage Treatment Plant consists of filter backwash, i.e. water used to clear solids from the filters along with the solids themselves. The proposed modification consists entirely in allowing the permittee to calculate flows at two locations instead of metering them, and in modifying the description for two other flow measurements so as to allow metering to occur in more accessible locations. The flows to be calculated are from systems which each have one incoming and two outgoing flows, the second of which can be calculated by subtraction. Submitted to *Gloucester County Times* for newspaper publication.

General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
ADMINISTRATIVE CONSENT ORDER
FRESHWATER WETLANDS PROTECTION ACT

TAKE NOTICE THAT THE DEPARTMENT OF ENVIRONMENTAL PROTECTION intends to execute an Administrative Consent Order to settle enforcement claims as to specific violations of the FRESHWATER WETLANDS PROTECTION ACT, N.J.S.A. 13.9B-1 et seq., and the rules promulgated pursuant thereto, N.J.A.C. 7:7A-1 et seq.

IN THE MATTER OF:	William and Constance Smith
SUBJECT PROPERTY:	Block 2310, Lot 1.08
	Borough of Franklin Lakes, Bergen County

The Department of Environmental Protection cited William and Constance Smith for violating the Freshwater Wetlands Protection Act at the subject property by placing fill in an area of freshwater wetlands. To resolve the violation the Smiths have reconfigured a portion of their driveway, removed a portion of a wooden deck and removed all fill material from the floodplain (which includes an area of wetlands) on the site. The proposed Administrative Consent Order (ACO) requires that William and Constance Smith complete the planting of vegetation on the area of restored wetlands by April 30, 2003 and monitor the success of the restoration for three years. The Smiths are further required to perform any remedial action directed by the Department over the next three years to ensure the success of the restoration. The ACO also requires that the Smiths purchase credits from an approved mitigation bank for 4,500 square feet of wetlands to compensate for 1,500 square feet of wetlands which are not being restored on the property. The ACO also requires that the Smiths pay a penalty of $4,000.

Comments regarding this proposed Administrative Consent Order, or requests for a copy of the proposed Administrative Consent Order, may be sent to:

NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
DIVISION OF SOLID AND HAZARDOUS WASTE
PUBLIC NOTICE

Notice is hereby given that the New Jersey Department of Environmental Protection, Division of Solid and Hazardous Waste has tentatively approved an application made by the Pollution Control Financing Authority of Camden County to renew their Solid Waste Facility Permit to operate an existing sanitary landfill in accordance with N.J.A.C. 7:26-1 *et seq.* and by authority of N.J.S.A. 13:1E-1 *et seq.*

The landfill is located at 9600 River Road in Pennsauken Township, Camden County. The landfill is owned and operated by the Pollution Control Financing Authority of Camden County, located at 729 Hylton Road, Pennsauken, New Jersey. This landfill is a state-of-the-art, double composite lined facility. The flow of waste to the landfill is limited due to the operation of the Camden County Resource Recovery Facility. Incinerator ash is not disposed of at the landfill. Some by-pass waste is handled when the incinerator reaches capacity or is down for repairs. The Intermediate Processing Facility (IPF) building was originally used as a solid waste baler facility. Now it serves as a vehicle maintenance area and as a tire chipping area for a research, development and demonstration (RD&D) project.

The permit action prepared by the Department is based on the administrative record that is on file at the offices of the Department, Division of Solid and Hazardous Waste, Office of Permitting and Technical Programs, located at 401 E. State Street in the City of Trenton, Mercer County, New Jersey. It is available for inspection, by appointment, Monday through Friday, between 9:00 A.M. and 4:00 P.M. Appointment for inspection may be made in writing to the Office of Permitting and Technical Programs, by fax at (609) 633-9839 or by calling (609) 984-5950. Requests should be made to the attention of Ms. Rebecca Croke, file custodian. Copies of the tentative approval and the project fact sheet are also available for review at that office and the office of Pat Gudis, Pennsauken Township Clerk, located at 5605 N. Crescent Blvd., Pennsauken, New Jersey, 08110.

Comments on the tentative approval or a request that the Department hold a non-adversarial public hearing must be submitted in writing to the person specified below during the public comment period which begins on the date of the publication of this notice and closes on December 22, 2002.

All interested persons, including the applicant, who believe any aspect of the tentative approval is inappropriate shall raise all reasonably ascertainable issues and submit all reasonably available arguments and factual grounds supporting their position, including all supporting material, by the close of the public comment period. All supporting materials shall be included in full and may not be incorporated by reference, unless they are already part of the administrative record in the same proceeding, or consist of State or Federal statutes and regulations or other generally available reference materials.

Any interested person who reasonably requires additional time within which to supplement the administrative record should request, in writing, an extension of the public comment period, and the Department will exercise reasonable discretion in setting the closing date for public comment. The Department will publish subsequent notice of any decision to extend the period for public comment. Any notice of an extension of the public comment period will clearly set forth the closing date of such extension.

If any request for a public hearing, in the opinion of the Department, raises significant issues of fact relevant to the proposed agency action during the public comment period, a public hearing will be scheduled regarding the proposed agency action. The Department will publish subsequent notice of a scheduled hearing.

The Department will respond to all relevant comments submitted during the public comment period. These comments and the Department's responses will be set forth in a response document which will become part of the administrative record upon which the Department will base its final decision. Any person who has submitted relevant written comments will receive notification of the Department's final decision.

Written comments should be submitted to:

LAND USE REGULATION PROGRAM
INTENT TO SETTLE

The Land Use Regulation Program has agreed to settle the pending appeal of Freshwater Wetland Letter of Interpretation Application File #1505-00-0043.1 for property designated Block 1257, Lots 1, 2, 3, 4, 35, 36, 37, 38, 39, & 40 Berkeley Township, Ocean County. Both the Program and the applicant, Lori Hartigan, have agreed to the location of wetlands on the property in question. The settlement would allow the applicant to construct a single family dwelling unit within an agreed to buildable area. The settlement would preclude any further development outside of the agreed to buildable area.

Comments regarding this proposed settlement may be forwarded within 10 days of this notice to:

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
ADMINISTRATIVE CONSENT ORDER
FRESHWATER WETLANDS PROTECTION ACT

TAKE NOTICE THAT THE DEPARTMENT OF ENVIRONMENTAL PROTECTION intends to execute an Administrative Consent Order to settle enforcement claims as to specific violations of the FRESHWATER WETLANDS PROTECTION ACT, N.J.S.A. 13.9B-1 et seq., and the rules promulgated pursuant thereto, N.J.A.C. 7:7A-1 et seq.

IN THE MATTER OF:	William and Constance Smith
SUBJECT PROPERTY:	Block 2310, Lot 1.08
	Borough of Franklin Lakes, Bergen County

The Department of Environmental Protection cited William and Constance Smith for violating the Freshwater Wetlands Protection Act at the subject property by placing fill in an area of freshwater wetlands. To resolve the violation the Smiths have reconfigured a portion of their driveway, removed a portion of a wooden deck and removed all fill material from the floodplain (which includes an area of wetlands) on the site. The proposed Administrative Consent Order (ACO) requires that William and Constance Smith complete the planting of vegetation on the area of restored wetlands by April 30, 2003 and monitor the success of the restoration for three years. The Smiths are further required to perform any remedial action directed by the Department over the next three years to ensure the success of the restoration. The ACO also requires that the Smiths purchase credits from an approved mitigation bank for 4,500 square feet of wetlands to compensate for 1,500 square feet of wetlands which are not being restored on the property. The ACO also requires that the Smiths pay a penalty of $4,000.

Comments regarding this proposed Administrative Consent Order, or requests for a copy of the proposed Administrative Consent Order, may be sent to:

NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
DIVISION OF SOLID AND HAZARDOUS WASTE
PUBLIC NOTICE

Notice is hereby given that the New Jersey Department of Environmental Protection, Division of Solid and Hazardous Waste has tentatively approved an application made by the Pollution Control Financing Authority of Camden County to renew their Solid Waste Facility Permit to operate an existing sanitary landfill in accordance with N.J.A.C. 7:26-1 *et seq.* and by authority of N.J.S.A. 13:1E-1 *et seq.*

The landfill is located at 9600 River Road in Pennsauken Township, Camden County. The landfill is owned and operated by the Pollution Control Financing Authority of Camden County, located at 729 Hylton Road, Pennsauken, New Jersey. This landfill is a state-of-the-art, double composite lined facility. The flow of waste to the landfill is limited due to the operation of the Camden County Resource Recovery Facility. Incinerator ash is not disposed of at the landfill. Some by-pass waste is handled when the incinerator reaches capacity or is down for repairs. The Intermediate Processing Facility (IPF) building was originally used as a solid waste baler facility. Now it serves as a vehicle maintenance area and as a tire chipping area for a research, development and demonstration (RD&D) project.

The permit action prepared by the Department is based on the administrative record that is on file at the offices of the Department, Division of Solid and Hazardous Waste, Office of Permitting and Technical Programs, located at 401 E. State Street in the City of Trenton, Mercer County, New Jersey. It is available for inspection, by appointment, Monday through Friday, between 9:00 A.M. and 4:00 P.M. Appointment for inspection may be made in writing to the Office of Permitting and Technical Programs, by fax at (609) 633-9839 or by calling (609) 984-5950. Requests should be made to the attention of Ms. Rebecca Croke, file custodian. Copies of the tentative approval and the project fact sheet are also available for review at that office and the office of Pat Gudis, Pennsauken Township Clerk, located at 5605 N. Crescent Blvd., Pennsauken, New Jersey, 08110.

Comments on the tentative approval or a request that the Department hold a non-adversarial public hearing must be submitted in writing to the person specified below during the public comment period which begins on the date of the publication of this notice and closes on December 22, 2002.
