Article VIII, Section 3, Paragraph 1 of the New Jersey Constitution requires the State to assert its riparian claims to land which has not been flooded by the tide since November 3, 1961, or forfeit its claim. Similarly, as to land which requires the status of property not tidally flooded for 40 consecutive years after November 3, 1961, the State must assert its riparian claim before the conclusion of the 40 year period or lose it. These maps are adopted to avoid these forfeitures and constitute the State's claims to riparian lands.

The claim lines do not reflect the changes constantly occurring from the movement of land and water at the ocean's shore and elsewhere, or the impact of additional data which may become available or usable after the maps were drawn. Also, the claim lines do not show valid grants made by the State and, therefore, also do not reflect grant overlays, suggested riparian land inshore or adjacent to grants, or the legal effects of failed grants. Nor do the lines drawn reflect or impact on claims made in particular litigation, or reflect filling under the Wharf Act of 1931 or the location of the former level of tide in inland waterways. In all these respects the lines are subject to alteration.

To the extent not precluded by the New Jersey Constitution or applicable law, the Tideland Resource Council reserves the right to adjust the claim lines landward or seaward as new evidence becomes available.
